1. Before You Start

This guide walks you through using LobsterLog to file your electronic logbook (ELOG) with Fisheries and Oceans Canada (DFO). It covers everything from first setup to sending your catch report, plus the two extra forms DFO requires: the Marine Mammal report (Form 222) and the Inactivity report (Form 233).

You do not need to be good with phones to use this guide. Each step tells you exactly what to tap. If you get stuck, the support number is at the back.

What you'll need before you begin

Your smartphone (iPhone or Android) with LobsterLog installed.

Your DFO Licence Number, your Licence Holder's FIN, and your Vessel Number (VRN) — all exactly as they appear on your licence.

Your ELOG Key from DFO. If you don't have it, call DFO Client Support at 1-877-535-7307.

An internet or cell connection — needed only when you send to DFO, not while you fill in your log.

A note on regions: LobsterLog works in all four Atlantic regions. The app shows you only the fields your region requires — so what you see on your screen may be slightly different from what another fisherman in another region sees. That is normal and correct.

2. Installing and Opening LobsterLog

2.1 Download the app

LobsterLog is free to download. It works on iPhone (iOS 14 or newer) and Android (version 8 or newer).

1. Open the App Store (iPhone) or Google Play Store (Android).
2. Search for LobsterLog.
3. Tap Get or Install and wait for it to finish.
4. Tap Open, or find the lobster icon on your home screen and tap it.

[SCREENSHOT]

App Store / Google Play listing for LobsterLog

Figure pending — external capture of the store listing (not an app screen); to be added when the DFO ELOG release is live on the App Store and Google Play.

2.2 Choose your language

The first time you open LobsterLog, it asks you to choose your language. Tap **English** or **Français**. You can change this later at any time (see Section 12).

Language selection screen with English and Français buttons

2.3 Log in

LobsterLog uses an account to keep your logbook safe. Enter your email address and password, then tap **Log In**.

A mobile app login screen for 'LobsterLog Digital Logbook'. The screen has a dark blue background. At the top, a status bar shows the time '3:53' and battery level. Below the status bar is a circular logo of a red lobster. The app name 'LobsterLog' is in white, with 'Digital Logbook' underneath. A white rounded rectangle contains the login form. It starts with 'Welcome Back' in bold. Below is an 'EMAIL' field with an envelope icon and the text 'name@example.com'. Then a 'PASSWORD' field with a lock icon and masked dots. A blue link 'Forgot Password?' is to the right of the password field. At the bottom of the form is a blue 'Log In' button. Below the button is the text 'Need an account? Sign Up'.

Log In screen with email and password fields

3. Activating DFO ELOG

DFO ELOG is the part of the app that files your official logbook. You turn it on once, for your region, using the key DFO gave you.

3.1 Open DFO ELOG Setup

1. From the main screen, tap the red **DFO ELOG** button at the top.
2. The DFO ELOG Setup screen opens. (Once you have activated, this same button takes you to your DFO ELOGs list instead.)

The screenshot shows the main screen of the LobsterLog app. At the top, there's a dark blue header bar with the time 4:06, a black pill-shaped area, and status icons for signal and battery. Below this, a white bar contains a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and a red button labeled 'DFO ELOG'. The main content area has a date selector for 'Sun, Jul 19, 2026'. Below the date are two summary cards: 'DAYS OUT' showing '0 This season' and 'THIS WEEK' showing '0 Sun - Sat'. The 'Daily Log' section contains input fields for 'LBS CAUGHT' (0) and 'PRICE / LB' (\$0.00), and fields for 'WATER TEMP' and 'WIND (KTS)'. It also features a 'WIND DIRECTION' row with buttons for N, NE, E, SE, S, and SW, and a 'CONDITIONS' row with buttons for Sunny, Cloudy, Rain, Fog, and W. At the bottom is a 'NOTES' section with a text area containing the text 'Crew, gear issues...'.

Main screen with the red DFO ELOG button at the top

3.2 Enter your region and licence details

1. Select your region: **Quebec (QC)**, **Gulf (GLF)**, **Maritimes (MAR)**, or **Newfoundland & Labrador (NL)**.
2. Enter your Fishing Licence Number, exactly as on your licence.
3. Enter your **Licence Holder's FIN**, exactly as on your licence.

Don't have your ELOG Key?

Call DFO Client Support at 1-877-535-7307 (Monday to Friday, 8:00 a.m. to 9:00 p.m. Atlantic time), or visit dfo-mpo.gc.ca/elogs.

Activate DFO ELOG

Already activated? Restore Purchase

(b)

DFO ELOG Setup screen with region picker, Licence Number, and FIN fields

3.3 Activate

1. Tap **Activate DFO ELOG**.
2. Complete the in-app purchase for the DFO ELOG Season Pass.
3. *Note for DFO reviewers: demo and reviewer accounts activate without the purchase step — the Season Pass applies to regular harvester accounts only.*

Once activated, the DFO ELOG features unlock and you're ready to file your first logbook.

3.4 First activation — Privacy Notice

The first time you open your DFO ELOGs list after activating, LobsterLog shows a Privacy Notice. Read it and tap Accept to continue. It is shown once per device.

(d)

The Privacy Notice — (a) to (c) the notice as you scroll through it; (d) what you see if you decline

3.5 The attestation

Each time you restart the app and open the DFO ELOG section, you'll be asked to confirm a Harvester Attestation. This is you certifying that the information you enter is true, accurate, and complete. DFO requires this. Tap to confirm and you're in.

4. Setting Up Your Captain Profile

Before you can file a logbook, LobsterLog needs to know who you are and which boat you fish. You enter this once. The app uses it on every report it sends to DFO, so it must be correct.

Why this matters

These values go into every submission to DFO. If a single digit is wrong, DFO will reject your report. Enter everything exactly as it appears on your licence.

4.1 Open your profile

1. From your DFO ELOGs list, tap the **Profile** button.
2. Tap into each field and type your information.

4.2 Fill in your details

Fill in these fields:

- Operator Name — your complete name, as the one running the boat.
- Licence Holder's FIN — the FIN for the person holding the licence, exactly as printed.
- Vessel Number (VRN) — the registration number for your vessel.
- Fishing Licence Number — the number on your lobster licence.

- Fishing Area (e.g. LFA 34) — pick your LFA from the menu. Your region, chosen during DFO ELOG Setup, is what decides most of the fields you will see. A few fields depend on your fishing area as well.
- Total # of Fishing Gear — how many traps you are licenced for.
- Gear Type (e.g. pot/trap) — such as traps.
- ELOG Key — the 24-character code from DFO; you enter it once and it stays on your phone to identify you on every report.

Tap **Save Profile** when finished to store your details on your device.

The screenshot shows a mobile application interface for a 'Captain Profile'. At the top, there is a back arrow and the title 'Captain Profile'. Below this is a section titled 'Vessel & Licence Details'. The form contains several input fields, each with a label and a red asterisk indicating a required field. The fields are: 'OPERATOR NAME' with the value 'LobsterLog Demo', 'LICENCE HOLDER'S FIN' with the value '100400460', 'VESSEL NUMBER (VRN)' with the value '104460', 'FISHING LICENCE NUMBER' with the value '104460', 'FISHING AREA (E.G. LFA 34)' with a dropdown menu showing 'LFA 34', 'TOTAL # OF FISHING GEAR' with the value '200', and 'GEAR TYPE (E.G. POT/TRAP)' with the value 'Traps'. There is an empty input field at the bottom of the form. The entire form is enclosed in a dashed border, and the label '(a)' is centered below it.

(a)

(b)

Captain Profile screen, filled in, with Save button

5. Creating a Logbook Entry (Form 234)

Each fishing trip is one logbook entry. You build it section by section. Everything saves to your phone as you go — you do not need a connection until you send it to DFO at the end.

5.1 Start a new entry

1. From the main screen, tap DFO ELOG.
2. Tap **Fill Out New ELOG** to begin a new entry.

The DFO ELOGs list, with Fill Out New ELOG and the two form buttons at the top

5.2 Confirm your trip start

Before the form opens, LobsterLog shows you a Confirm Trip Start screen. This is a quick check that your profile details are right before you begin. Look over your operator name, Vessel Number (VRN), Fishing Licence Number, Licence Holder's FIN, and region.

1. If everything is correct, tap **Confirm & Continue**.
2. If something is wrong, tap **Edit Profile** to fix it first.

Edit Profile

Confirm & Continue

Confirm Trip Start screen showing trip date/time and profile details

5.3 Trip Information

This is the first card in the log, and you fill it in on every trip.

Above it sits the **Quick Capture** strip: tap **Start Sail** or **Start Haul** to stamp the exact time instead of setting it by hand. Once you have, the button shows the time it recorded.

These fields are on the card in all four regions:

- **Date Fished ★** — the day you fished.
- **Trip ID (auto-generated)** — the app makes this number for you and greys the box out. You cannot type in it and you do not need to. It is how the app and DFO both refer to this trip.
- **Trip Start Time ★** — when you left the wharf. This is one of the four times DFO needs — see Section 5.4.

The fields marked ★ carry a red star on screen and have to be filled in.

There is also an **Add a note** button in the card's header if you want to write something down for your own records.

What your region adds

Maritimes

- **Crew Registry ★** — add each crew member from the list. Tap the × beside a name to take it off again.

The Maritimes card also carries the **At-sea observer** button in its header — see below. Maritimes harvesters do not enter a departure port.

Gulf

Gulf harvesters fill in the three fields above and nothing more. There is no crew registry and no departure port on this card.

Quebec

- **Crew Registry ★** — add each crew member from the list.
- **Departure Port ★** — choose the port you sailed from.

Newfoundland & Labrador

- **Departure Port ★** — choose the port you sailed from.

Newfoundland harvesters do not enter a crew registry.

If you carry an at-sea observer

Maritimes only. If you fish another region you will not see this button, and that is correct.

An at-sea observer is a certified person from a DFO-approved observer company who rides along and records the catch independently of you. It does not happen often on LFA 34, but it does happen.

When one is aboard, that trip has its own number from the observer program. You will normally read it off a slip.

Tap **At-sea observer** in the card's header and a box appears above Date Fished:

- **Observer Sea Trip Number** — type the number from the slip. They look like **G12-001A01**.

This one is optional

The observer box has no red star. On the great majority of trips there is no observer aboard, you leave it empty, and the log closes and sends exactly as it should.

5.4 The four times DFO needs

DFO needs four times from every trip. They are no longer in one place — each one sits on the card it belongs to. The fields marked with a red star (*) are required.

- **Trip Start Time** — when you left the wharf. On the **Trip Information** card.
- **Time Started Hauling** — when you began hauling your first trap. On the **Catch & Effort** card.
- **Time Stopped Hauling** — when you finished hauling. On the **Catch & Effort** card.
- **Time of Landing** — when you landed your catch. On the **Landing** card.

The **Trip Information** card also has a **Quick Capture** strip at the top: tap **Start Sail** or **Start Haul** to stamp the exact time instead of setting it by hand.

Tip

Set your phone's own date and time correctly before you start. LobsterLog uses your phone's clock for these timestamps.

The screenshot shows the LobsterLog app interface on a mobile device. At the top, the status bar displays the time 3:02, signal strength, Wi-Fi, and battery icons. Below the status bar is a dark blue header with a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and a red button labeled "X DFO ELOG". A "Back to Logs" link is visible below the header. The main content area features a "Quick Capture" section with two buttons: "Sailed 08:16" and "Start Haul". Below this is the "Trip Information" card, which includes a calendar icon, "Add a note" and "At-sea observer" buttons, and fields for "DATE FISHED" (2026-09-04), "TRIP ID (AUTO-GENERATED)" (LL-20260904-001), "CREW REGISTRY" (John Doe), and "TRIP START TIME" (Sep 4, 08:16). At the bottom, there is a "Landing" section with a clock icon and a "PORT LANDED" field.

5.5 Catch & Effort

This is where you record where you fished, how long your gear was down, and what you kept. It is the longest card in the log, and it is built in two layers: **fishing efforts**, and inside each effort, **trap groups**.

How the card is built

A **fishing effort** is one stretch of hauling in one fishing area. Most days you will have one. If you hauled in two different areas on the same trip, or you hauled, stopped for several hours, and hauled again, that is two efforts.

A **trap group** is a set of traps inside that effort that share the same details — the same grid, the same soak time, the same position. If all your gear that day was on the same ground, one trap group is enough. If you hauled one string on one piece of bottom and another string somewhere else, use two.

You can add as many of each as you need.

Starting the card

The card opens with your licence number and a question:

Did you haul gear?

Answer **No** and the card closes up — there is nothing more to fill in. See Section 6.5 for what happens next.

Answer **Yes** and **Fishing Effort 1** appears.

What every harvester fills in

These fields are on the card in all four regions:

- **Fishing Area (LFA)** — choose the area you fished from the list.
- **Time Started Hauling** — the date and time you began hauling.
- **Time Stopped Hauling** — the date and time you finished.

Then, inside **Trap Group 1**:

- **Estimated Kept Weight (lbs)** — the weight of the lobster you are keeping from this group of traps. Not the total weight of everything that came up.
- **Trap Hauls** — how many traps you hauled in this group.

Below the trap group there is a **+ Add trap group** button, and two questions you must answer for every effort:

- **Was there any interaction with a species at risk during this fishing effort?**
- **Was there any interaction with a marine mammal during this fishing effort?**

Answer both. If you answer **Yes** to either, the app will ask you for the details — see Section 5.8 for species at risk, and Section 9 for the Marine Mammal form.

There is also an optional **Note** box if you want to write anything down for your own records.

What your region adds

The app only ever shows you the fields your own region and fishing area require

If something below is not on your screen, it is because DFO does not ask for it where you fish. That is correct, not a fault.

Maritimes

- **Lobster Settlement Grid** — required. Choose your grid from the list.

Maritimes harvesters do not enter soak duration, and on most areas there are no position boxes. Fishing area 38b is the exception — on 38b you will be asked for latitude and longitude.

Gulf

- **Soak Duration (Days)** — required, in whole days.
- **Latitude** and **Longitude** — required. Use **Capture GPS** to fill them from your phone, or type them in by hand.

Gulf harvesters do not enter a settlement grid.

Quebec

On most Quebec areas:

- **Grid** — required.
- **Soak Duration (Days)** — required, in whole days.
- **Number of Specimens Discarded** — optional.
- **Latitude** and **Longitude** — required, by GPS or by hand.

On the **20-series areas** the card is different: there is **no grid**, and two extra counts appear, both required:

- **Nb. Lobsters Caught Already V-Notched** — how many notched lobsters came up in your traps.
- **Nb. Lobsters V-Notched By You** — how many you notched yourself before putting them back.

Read those two carefully. They are not the same question.

Newfoundland & Labrador

At the effort level, above the trap group:

- **Gear Subtype** — required. Choose from the list.

Inside the trap group:

- **Soak Duration (Days)** — required, in whole days.
- **Number of Specimens Kept** — required. A count of lobsters, not a weight.
- **Number of Specimens Discarded** — optional.
- **Nb. Lobsters V-Notched By You** — optional, and it appears only on some fishing areas.
- **Trap Size** — required. Choose from the list.

Newfoundland harvesters do not enter a settlement grid, and there are no position boxes.

Adding more

- **+ Add trap group** adds another group inside the same effort. Use this when you hauled gear on different ground under the same haul times.
- **+ Add fishing effort** adds a whole new effort. Use this when you hauled in a different area, or at a different time of day.

Closing the card

There are two ways to close, and they are not the same:

- **Close & Save** at the foot of an effort closes **that one effort**.
- **Close & Save All Efforts** at the foot of the card closes **every effort that is still open**.

Both are permanent. Fill the card in, look it over, then close. See Section 6.

Bycatch

(b)

Bait Reporting — (a) two bait rows open, with + Add Bait and Close & Save All Bait; (b) the same rows closed and greyed

5.7 Bycatch

Bycatch is anything that came up in your traps that is not part of your kept lobster catch.

The **Bycatch** card sits inside **Interactions & Other**, below Bait. It opens with one question:

Was there any bycatch?

Answer **No** and there is nothing more to do — the card is finished.

Answer **Yes**, then tap **+ Add Bycatch**. A sheet opens with four things to fill in:

- **Species ★** — choose from the list.
- **Weight (lbs) ★** — your estimate for that species.
- **Note** — optional. Anything you want to record about this entry.
- **Usage ★** — what happened to it. Choose one:
 - **Personal Consumption** — you kept it for yourself.
 - **Crew Share** — it went to the crew, given or sold.
 - **Sale** — you sold it.
 - **Discard** — you put it back.
 - **Other** — anything else.

Tap **Add Entry** to save it, or **Cancel** to back out.

The entry appears on the card as a row showing the species, what you did with it, and the weight. Add as many rows as you need — one for each species.

Each row has its own **Edit** and **Close & Save**. Edit lets you change it while it is still open. Close & Save locks that row.

At the foot of the card, **Close & Save All Bycatch** closes every row that is still open, in one go.

One row per species

If you brought up rock crab in three different strings, that is still one bycatch row for rock crab, with your total estimate. Do not add a row per trap.

Lobster in the bycatch list

You will see **Lobster** in the bycatch species list, and that is on purpose.

It is for lobster that came up in your traps but could not be kept — undersized, berried, or already v-notched. Add a bycatch row for it, put in your weight estimate, and set **Usage** to **Discard**.

Some regions have their own counting boxes for v-notched lobster on the Catch & Effort card. If yours does not, this is where that catch gets recorded.

5.8 Species at Risk

If you had an interaction with a species at risk during a fishing effort, DFO needs to know about it.

You start this from the **Catch & Effort** card. At the foot of each fishing effort there is a question: **Was there any interaction with a species at risk during this fishing effort?**

Answer **Yes** and a **Species at Risk** block opens inside Interactions & Other.

Filling in the block

The app may offer to read your position from your phone's GPS. Say yes and it fills the position boxes for you. Say no and you can type the position in by hand.

Then fill in:

- **Species ★** — choose from the list.
- **What happened** — describe the interaction in your own words. This one is optional, but it is worth filling in.
- **Date & Time ★** — when it happened.
- **GPS Location ★** — latitude and longitude. See Section 11 for how to write a position.
- **Number of Specimens ★** — how many animals.
- **Total Estimated Weight (lbs)** — optional.
- **Specimen Condition ★** — choose from the list: whether the animal was alive, dead, or something else.

The fields marked ★ have a red star on screen. The block will not close until they are filled in.

More than one

If you had interactions with more than one species, tap **+ Add another species at risk** and a second block opens. Fill it in the same way.

Each block has its own **Close & Save**. At the foot there is **Close & Save All Species at Risk**, which closes every block still open.

If the app will not take your position

A species at risk position has to fall inside the range DFO sets for this report, and that range is narrower than the one for a fishing effort. If the app refuses your numbers, check the minus sign on the longitude first — see Section 11.

5.9 Personal Use

Maritimes only. If you fish another region you will not see this card, and that is correct.

If you kept some of your catch for your own table rather than selling it, DFO asks you to declare it.

The **Personal Use** card has one box:

- **Personal Use Declaration (lbs)** — the weight you kept for yourself.

There is no red star on this box. If you did not keep any, leave it blank and close the card.

There is also an **Add a note** button if you want to write something down alongside it.

Tap **Close & Save Section** when you are done.

Blank is not the same as zero

If you kept nothing, you can leave the box empty. If you want to say plainly that the answer is none, type **0**. The app sends what you type either way, and it will not put a zero in for you.

The screenshot shows the LobsterLog app interface. At the top, the status bar displays the time 8:29, a blacked-out phone number, and signal/battery icons. The app header is dark blue with a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and icons for a crown, a line graph, and a gear. A red button labeled "X DFO ELOG" is on the right. Below the header is a light blue bar with a back arrow and the text "Back to Logs". The main content area is white and contains several sections: a "TOTAL ESTIMATED WEIGHT (LBS)" section with a text input field containing "0"; a "SPECIMEN CONDITION *" section with a dropdown menu showing "Alive"; a yellow button labeled "Close & Save" with a lock icon; a dashed blue box with a plus icon and the text "Add another species at risk"; another yellow button labeled "Close & Save All Species at Risk" with a lock icon; a "Personal Use" section with a warning icon, the text "Personal Use", and an "Add a note" button; a "PERSONAL USE DECLARATION (LBS)" section with a text input field containing "5"; and a yellow button labeled "Close & Save Section" with a lock icon. At the bottom is a dark blue button labeled "Close & Save All" with a document icon.

5.10 Sections that depend on your region

Some sections appear only for certain regions. If you don't see one of these, it's because your region doesn't require it:

- Hail In / Hail Out — Maritimes only, and only for certain fishing areas. Record your hail company and confirmation number when required.
- Transfers — Quebec only. Record any at-sea transfer of catch when required.
- Crew Registry — Quebec and Maritimes.
- Departure Port — Quebec and Newfoundland & Labrador.
- Port Landed — all regions.

- Gear Subtype — Newfoundland & Labrador only.

This is by design

LobsterLog only ever shows you the fields your own region requires. You will never be asked to fill in something that doesn't apply to you.

The screenshot displays the LobsterLog app interface. At the top, the status bar shows the time 11:58, signal strength, Wi-Fi, and battery icons. The app header is dark blue with a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and icons for a crown, a line graph, and settings. A red button labeled "X DFO ELOG" is on the right. Below the header is a light blue bar with a back arrow and the text "Back to Logs". The main form area is white and contains several input fields: a date field with "10/7/77", a "POND/POUND NUMBER (SOURCE) *" field, a text input field with a placeholder "Enter either a source vessel VRN or a pond/pound number, not both.", a "RECEIVED FROM (VESSEL'S NAME)" field, a "TO VESSEL (VRN) *" field with "0", a "TO POUND NUMBER *" field with "P-42", and another text input field with a placeholder "Enter either a destination vessel VRN or a pound number, not both.". Below these is a "SENT TO (VESSEL'S NAME)" field. At the bottom of the form is a yellow button labeled "Close & Save Section" with a lock icon. Below the form is a dark blue button labeled "Close & Save All" with a document icon.

(c)

Transfers, Quebec — (a) carrier vessel, partnership type and transfers made, before the boxes open; (b) a transfer filled in; (c) the foot of the section, with the sent-to name box and Close & Save Section

The screenshot displays the LobsterLog mobile application interface. At the top, a dark blue header bar contains the time '11:59', a black pill-shaped placeholder, and status icons for signal and battery. Below this, the header features a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and a red button labeled 'DFO ELOG'. A light blue bar below the header has a back arrow and the text 'Back to Logs'.

The main content area shows a scrollable list of trap groups. The first group, 'Trap Group 1', is expanded to show several data entry fields:

- GRID ***: A dropdown menu with '1GV40' selected.
- ESTIMATED KEPT WEIGHT (LBS) ***: A text input field containing '400'.
- TRAP HAULS ***: A text input field containing '250'.
- SOAK DURATION (DAYS) ***: A text input field containing '2'.
- NUMBER OF SPECIMENS DISCARDED**: A text input field containing '8'.
- Capture GPS**: A button with a location pin icon.
- LATITUDE ***: A text input field containing '49.2150'.
- LONGITUDE ***: A text input field containing '-65.9420'.

Below 'Trap Group 1', the header for 'Trap Group 2' is visible, including a trash icon and an expand/collapse arrow.

(a)

The screenshot shows the LobsterLog mobile app interface. At the top, the status bar displays the time 12:04, signal strength, and battery level. The app header is dark blue with a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and icons for a crown, a line graph, and settings. A red button labeled 'X DFO ELOG' is on the right. Below the header is a light blue bar with a back arrow and the text 'Back to Logs'. The main content area is a scrollable list of trap groups. 'Trap Group 1' is partially visible, showing 'Grid 1GV40 — 400 lbs — 250 hauls'. 'Trap Group 2' is the active screen, featuring a red trash icon and an expand/collapse arrow. It contains several input fields: 'GRID' with a dropdown menu showing '1GZ40', 'ESTIMATED KEPT WEIGHT (LBS)' with the value '150', 'TRAP HAULS' with the value '90', 'SOAK DURATION (DAYS)' with the value '3', 'NUMBER OF SPECIMENS DISCARDED' with the value '4', 'LATITUDE' with the value '49.2480', and 'LONGITUDE' with the value '-65.8875'. A blue button with a location pin icon and the text 'Capture GPS' is positioned between the 'NUMBER OF SPECIMENS DISCARDED' and 'LATITUDE' fields.

(b)

A Quebec trap group — (a) group 1, with soak duration, the discard box and the coordinates; (b) a second trap group under the same fishing effort

6. Closing Sections

Before you can send a logbook, every section you used has to be closed. Closing a section records the date and time and locks it.

6.1 Closing one section at a time

Each card in the log has its own **Close & Save Section** button at the foot of that card. Fill the card in, look it over, then tap it.

A confirmation appears first. It names the section you are about to close:

Close Catch & Effort?

Once you close this section you can't change it in this log. Check it over first.

Tap **Not yet** to go back, or **Close & save** to close the section.

The confirmation shown before a section closes

6.2 What a closed section looks like

A closed card turns grey. You can still read what is in it, but you can no longer change it, and the **Close & Save Section** button is replaced by a locked banner:

Closed 2026-08-13 12:46

The banner shows the date and time the section was closed. That time goes to DFO with your submission.

The screenshot shows the LobsterLog mobile app interface. At the top, the status bar displays the time 8:32, signal strength, Wi-Fi, and battery icons. The app header is dark blue with a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and icons for a crown, a line graph, and settings. A red button labeled 'X DFO ELOG' is on the right. Below the header is a light blue bar with a back arrow and 'Back to Logs'. The main content area has a light grey background and contains several sections: a dropdown menu for 'Add crew member...', a 'TRIP START TIME' section with a date/time picker set to 'Sep 1, 05:30', a 'Landing' section with a red clock icon, a 'PORT LANDED' dropdown set to 'CLARKS HARBOUR', a 'TIME OF LANDING' date/time picker set to 'Sep 1, 13:20', and a 'Closed' banner with a lock icon and text 'Closed 2026-09-01 08:31'. Below this is a 'Catch & Effort' section with a green fish icon, a 'Licence 104460' field, a 'Did you haul gear?' question with 'No' and 'Yes' buttons, and a 'Fishing Effort 1' section with a 'FISHING AREA (LFA)' dropdown. A caption below the screenshot reads: 'A closed section — greyed body with the Closed banner'.

6.3 Closing everything at once

At the foot of the log there is a **Close & Save All** button. It closes every section still open and saves the log.

The confirmation tells you how many sections it is about to close:

Close and save all sections?

This will close 2 open sections and save the log. Once closed you can't change them in this log.

The number changes from log to log. Read it before you tap **Close all**.

Close & Save Section

Close & Save All

The foot of the log, with Close & Save All below the last card

6.4 Closing is final

Once a section is closed you cannot change it in that log. There is no way to reopen it in the app. That is why you are asked to confirm.

If you closed a section by mistake, you have two options:

- Contact the developer — support@lobsterlog.com.
- Contact DFO Client Support — 1-877-535-7307.

Closing a section also takes away your ability to delete the log.

Delete is offered only while nothing in the log is closed. The moment you close and lock any one section, the Delete button is gone — from the draft card on your DFO ELOGs list, from

the completed log's card, and from the notice the app shows when you try to start a new log while one is unfinished. Form 222 and Form 233 work the same way.

A log with a closed section cannot be deleted. It has to be finished and sent to DFO.

If you try to start a new log while one is still on the go, the app tells you:

Unfinished log

You already have a log on the go. It has closed sections, so it can't be deleted. Finish it and send it to DFO before starting a new one.

Tap **Review it** to go back to that log, or **Not now** to leave it where it is.

The screenshot displays the LobsterLog app interface. At the top, the status bar shows the time 9:49 and battery level. The app header includes a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and icons for a crown, a line graph, and settings. A red button labeled "DFO ELOG" is visible. Below the header is a navigation bar with "Profile", "DFO ELOGs", and "Help". The main content area features a blue button "+ Fill Out New ELOG" and two light blue buttons: "Form 222 Marine Mammal" and "Form 233 Inactivity". Under the "IN PROGRESS" section, a log card for "LL-20260907-002" is shown with a 50% completion status, the date "2026-09-07", and the ELOG UID "KWORGT". A progress bar indicates "50% · 7 of 14 required fields". Below the card are "Edit" and "Delete" buttons. The "SENT TO DFO" section shows a completed log card for "LL-20260907-001" with a green "Success" checkmark. The card details include the date "2026-09-07", Trip #4, Vessel 104460, ELOG UID OWHVSD, Confirmation # 164139, and the time "Sent 2026-09-07 1:30 PM (16:30 UTC)".

6.5 A day with no fishing effort

If you set gear but hauled none, answer **No** to **Did you haul gear?** on the Catch & Effort card. The rest of the card collapses — there is nothing to fill in and nothing to close.

When you close the **Landing** section, the app raises a notice:

No fishing effort

You did not declared any fishing effort in this logbook. If you hauled a fishing gear, you must complete the fishing effort section, otherwise, continue.

This notice is DFO's own wording, shown here exactly as it appears in the app.

Tap **Not yet** if you did haul and need to go back and record it. Tap **Continue** if the log is right as it stands.

Catch & Effort with Did you haul gear? set to No, and the no-effort notice raised on closing Landing

6.6 Form 222 and Form 233 close the same way

Form 222 and Form 233 are single forms rather than a set of cards. Each has one **Close & Save** button at the foot. The confirmation names the form:

Close the Marine Mammal form?

Once you close this section you can't change it in this log. Check it over first.

Once closed, the form moves to **Completed Logs** on the DFO ELOGs list, and you send it from its card there. See Section 7.

(a)

(b)

The same rule on the two forms — (a) the closed Marine Mammal — Form 222 card, which is the top card, offering Send to DFO and Review only; (b) the closed Inactivity — Form 233 card, again the top card. The cards below each of these are other logs and are not what this figure is showing.

7. Sending Your Logbook to DFO

Once every required section is filled in and closed, your entry is ready to send. You need an internet or cell connection for this step.

1. Go to the DFO ELOGs screen.
2. Find the log under **Completed Logs** and tap **Send to DFO** on its card.

If a section you used is still open, the send is refused. The app names the sections that are still open — close them, then send again.

Before it sends, LobsterLog automatically:

- Checks your entry against DFO's rules. If something is missing or wrong, it tells you so you can fix it before sending.
- Encrypts and signs your submission using your ELOG Key.
- Records the submission in your transmission register, kept on your phone for three years.

DFO ELOGs screen with Send to DFO button on an entry

The app then asks you to confirm. The dialog names the trip and says plainly that a send cannot be taken back:

Send to DFO?

Trip LL-20260904-001 will be submitted to DFO. This cannot be undone.
Review your entries before sending. Once sent, this log cannot be changed — if a correction is needed, contact DFO.

Tap **Cancel** to go back, or **Send** to send it.

The confirmation shown before a logbook is sent

A send can fail in two different ways, and they are not the same trouble. Either the log never reached DFO, or DFO received it and refused it. The red badge on the card tells you which: **Not sent** means it never left your phone. **Not accepted** means DFO has it and said no. See Section 7.1 for the first and Section 7.2 for the second.

7.1 If the log doesn't reach DFO

If your report doesn't go through — usually because you're out of range — LobsterLog tells you and keeps your log safe. This applies to logbooks and to your Form 222 and Form 233 cards alike.

- A red badge appears on the entry showing the last send failed.
- Your data is not lost. Tap **Retry** once you're back in range. The Retry button appears on the card, whether it is a logbook, a Form 222 or a Form 233.
- If it keeps failing, note the error code shown and contact LobsterLog support.

Failed sends also appear in your transmission register — see Section 8.3.

Out of range is fine

You can fill in your whole log at sea with no signal. It saves to your phone. You only need a connection at the moment you send — and if that fails, your log waits safely until you tap **Retry**.

The screenshot displays the LobsterLog mobile application interface. At the top, the status bar shows the time 1:04 and battery level. The app header includes a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and a red button labeled "DFO ELOG". Below the header is a navigation bar with "Profile", "DFO ELOGs", and "Help" tabs. The main content area features a blue button "+ Fill Out New ELOG" and two light blue buttons: "Form 222 Marine Mammal" and "Form 233 Inactivity". Under the heading "COMPLETED LOGS", there is a log entry for "LL-20260907-001" dated "2026-09-07" with ELOG UID "OWHVSD". This entry includes a "2d 21h to submit" timer, a red "Last send failed · Not sent · Tap Retry" message, a red "Retry" button, and a blue "Edit / Review" button. Below this, under the heading "SENT TO DFO", is a successful log entry for "LL-20260803-001" dated "2026-08-03" with a green "Success" checkmark. This entry lists "Trip #3", "Vessel 104460", "ELOG UID TXLTYJ", and "Confirmation # 163860".

(c)

A send that never reached DFO — (a) the log card, with the Not sent badge, Retry and Edit / Review;
(b) the alert; (c) the transmission result sheet, with no confirmation number, no DFO response code
and no HTTP status

7.2 If your log is not accepted

Sometimes the log does reach DFO and DFO refuses it. That is a different problem from being out of range, and it needs a different fix.

The badge on the card reads **Last send failed · Not accepted · Tap Retry**.

The app shows you DFO's own words, and their error code:

Submission Rejected by DFO
Your ELOG was received but rejected by DFO.
Error WS1003: DFO Web Service error WS1003
Please correct the error and tap Retry.

Tapping **Retry** asks you to confirm first:

Retry Submission?
Trip LL-20260904-001 will be submitted to DFO. This cannot be undone.

Retrying on its own will not help unless something has changed. Something in the log is wrong, and DFO has named it with a code. Note the code, tap **Edit / Review** to look the log over, and if you cannot see what is wrong, call support and quote that code.

The entry also appears under **Failed Transmissions** in your transmission register, with the error DFO returned — see Section 8.3.

Telling this apart from a log that never arrived

Open the transmission result sheet and read three rows:

- **DFO response code** — a log DFO refused carries one, such as WS1003. A log that never arrived shows a dash.
- **HTTP status** — a log DFO refused shows 200, because the connection worked. A log that never arrived shows a dash.
- **Confirmation #** — a dash on both. The app records a confirmation number only when DFO answers Success (WS0000), and the number itself only confirms the file reached DFO — so this row does not tell the two apart.

(e)

A log DFO refused — (a) the card, with the Not accepted badge; (b) the retry confirmation; (c) DFO's rejection, quoting its own error code; (d) the entry under Failed Transmissions in the register; (e) the transmission result sheet, carrying a DFO response code and an HTTP status of 200

8. Your Transmission Register

Every time you send something to DFO, LobsterLog keeps a record of it. The transmission register is your own copy of what went out, when, and what DFO said back. It stays on your phone.

Your logbooks, your Form 222 marine mammal reports and your Form 233 inactivity reports all appear in the same list.

8.1 Opening the register

From the main screen, tap **DFO ELOG**. Everything you have sent appears under **Sent to DFO**, newest first. Each entry shows the trip number and ELOG UID for logbooks, your vessel number, the confirmation number DFO gave you, when it was sent, and whether it shows Success or Fail.

The transmission register, showing logbooks and both other forms

8.2 Looking at one submission

The transmission result

Tap any entry to see the full record. It opens as a Transmission Result sheet, headed with the trip number and its Success or Fail badge. It shows:

- Trip — the trip number this submission belongs to.
- ELOG UID — the six-character code the app gave that logbook.

- Vessel — your vessel registration number.
- Confirmation # — DFO's receipt number for that submission. This is your proof it arrived.
- Sent — when it went, in your own time and in UTC.
- DFO response code — WS0000 means the file was transferred successfully. Checking the contents is a separate step on the DFO side.
- File name — the exact name of the file DFO received.
- XSD validation — whether the file passed the format check before it was sent.
- HTTP status — 200 means the connection worked.

View XML at the foot of the sheet opens the exact file that went to DFO. It opens in a document viewer headed with the file name, showing the XML as it was sent, so you can see for yourself what DFO received.

Save to phone at the foot of the viewer keeps a copy of that file on your own phone.

The View button — your logbook as it was sent

Every card under Sent to DFO carries a **View** button. Tap it and the whole logbook opens the way you filled it in — every card, every entry — but locked.

The view opens with a notice across the top:

This log has been sent to DFO and cannot be changed.

If a correction is needed, contact DFO.

You can read and scroll the whole log. Nothing can be typed in, and nothing can be closed again. Tap **Back to Logs** at the top to return to the register.

If something in a log you have already sent is wrong, the answer is the same as in Section 6.4 — contact the developer, or contact DFO Client Support.

8.3 If a submission failed

Anything that did not go through appears under **Failed Transmissions**, at the bottom of the register, with the error DFO returned. See Section 7.1 for what to do next.

8.4 Log History — your three-year archive

Tap **Log History** at the bottom of the register to see everything you have sent over the past three years. Use the **Month** and **Year** menus to narrow it down — handy if DFO asks about a particular trip, or at season's end.

The cards in Log History carry the same **View** button as the register, so you can open any logbook from the past three years and read it as it was sent.

Log History, with its Month and Year filters, and the View button on each logbook card

A Form 222 submission in the archive

8.5 Why this matters

If DFO ever asks whether you filed, the register is your answer. The confirmation number is the one thing DFO can look up on their side, so that is the number to quote.

9. Form 222 — Marine Mammal Report

You must file Form 222 whenever you have an interaction with a marine mammal during a trip. This is sent to DFO separately from your logbook.

1. Go to the DFO ELOGs screen.
2. Tap **Form 222 · Marine Mammal**.

3. Fill in all required fields: date, species, type of interaction, and location.
4. Tap **Close & Save** at the foot of the form and confirm.

The form moves to **Completed Logs** on the DFO ELOGs list. Tap **Send to DFO** on its card to send it (see Section 7).

Like your logbook, Form 222 is saved in your transmission register. If a submission fails, use the Retry button.

The screenshot shows a mobile application interface for 'Form 222 · Marine Mammal'. At the top, there is a status bar with the time '3:45' and a black pill-shaped notch. Below the status bar is a navigation bar with a back arrow and the title 'Form 222 · Marine Mammal'. The main content area is divided into three sections: 1. 'Interaction Indicator' with the question 'DID A MARINE MAMMAL INTERACTION OCCUR?' and two buttons: 'Yes' (blue) and 'No' (white). 2. 'Report Details' with two input fields: 'DATE OF REPORT' (with a red asterisk) containing '2026-09-01' and a calendar icon, and 'LOGBOOK NUMBER REFERRED' (with a red asterisk) containing 'KKIQNL'. 3. 'Interaction Details' with two input fields: 'DATE OF INTERACTION' (with a red asterisk) containing '2026-09-01' and a calendar icon, and 'TIME OF INTERACTION' (with a red asterisk) containing '08:25' and a clock icon. At the bottom, there is a partially visible 'Location' input field.

10. Form 233 — Inactivity Report

You file Form 233 when you have not fished during a reporting period. It tells DFO that you were inactive, so your reporting stays complete.

1. Go to the DFO ELOGs screen.
2. Tap **Form 233 · Inactivity**.
3. Enter the start and end dates of the period you didn't fish (format: YYYY-MM-DD).
4. Choose the reason for inactivity from the list.
5. Tap **Close & Save** at the foot of the form and confirm.

The form moves to **Completed Logs** on the DFO ELOGs list. Tap **Send to DFO** on its card to send it (see Section 7).

The screenshot shows a mobile application interface for filing Form 233 · Inactivity. The form is titled "Form 233 · Inactivity" and is divided into two main sections: "Licence Details" and "Reporting Period".

Licence Details

- OPERATOR NAME**: LobsterLog Demo
- FISHING LICENCE NUMBER**: 104460
- LICENCE HOLDER'S FIN**: 100400460

Reporting Period

- START DATE**: 2026-08-20
- END DATE**: 2026-08-25
- Add a note**: A button with a notepad icon.

Referred ELOG UID: A field for entering the UID.

Below the status bar is a white header with a back arrow and the title 'Form 233 · Inactivity'. The main content area is white and contains several sections: 1. 'Add a note' button with a notepad icon. 2. 'Referred ELOG UID' section with a text input field containing the placeholder 'Logbook this report refers to'. 3. 'Reason for Inactivity' section with a dropdown menu labeled 'REASON' and a red asterisk, currently showing 'Weather' with a downward arrow. 4. 'Comments (Optional)' section with a large text input field containing the placeholder 'Comments on the inactivity'. At the bottom is a dark blue button with a save icon and the text 'Close & Save'. Below the form, centered, is the text '(b)'.

11. GPS and Coordinates

Where positions are asked for

The app asks for a position in three places, and they are not the same:

- **On your fishing effort** — inside the trap group, and only in some regions. See below.
- **On a Species at Risk report** — always, in every region.
- **On the Marine Mammal form (Form 222)** — always, in every region.

There is no separate GPS card. The boxes sit inside whichever card is asking.

Which regions ask for an effort position

- **Quebec** — required.
- **Gulf** — required.
- **Maritimes** — only on fishing area 38b.
- **Newfoundland & Labrador** — not asked for.

If you fish the Maritimes outside 38b, or you fish Newfoundland, **you will not see latitude and longitude boxes on your Catch & Effort card**. That is correct. DFO does not ask for them where you fish.

Filling in a position

Two ways:

Let the app read it. Tap **Capture GPS** and the app fills both boxes from your phone. The first time you do this, the phone will ask you to allow location access — say yes, or the button cannot work.

Type it in yourself. Tap the box and enter the numbers by hand. Use this if you are filling in the log later, back at the wharf, or if your phone cannot get a fix.

The app records which way you did it, because DFO asks whether a position came from a satellite or was entered by hand.

How to write a position

The app uses **decimal degrees**, not degrees and minutes, and not N/S/E/W letters.

- **Latitude** is a positive number. Example: **43.4521**
- **Longitude** is a **negative** number, because Atlantic Canada is west of the prime meridian. Example: **-65.6218**

Do not leave the minus sign off the longitude

Without it the position is on the wrong side of the world and DFO will not accept it.

If your plotter shows degrees and minutes — say 43° 27.1' N, 65° 37.3' W — you will need to convert. Divide the minutes by 60 and add:

- $27.1 \div 60 = 0.4517$, so **43.4517**
- $37.3 \div 60 = 0.6217$, so **-65.6217**

If the app will not take your numbers

Every position has a range it must fall inside, and the range is different depending on which card you are filling in. If the app refuses a number, check:

- The minus sign is on the longitude.
- You have not swapped latitude and longitude.

- The decimal point is in the right place.

A Species at Risk position must fall inside the range DFO sets for that report, which is narrower than the range for a fishing effort. If you are sure your numbers are right and the app still refuses them, call support — the number is at the back of this guide.

Closing

The position boxes have no close button of their own. They close with the card they sit in — the trap group closes with its fishing effort, and a Species at Risk position closes with that block. See Section 6.

The screenshot shows the LobsterLog app interface. At the top, the status bar displays the time 11:59, signal strength, and battery level. Below this is a dark blue header with a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and icons for a crown, a line graph, and settings. A red button labeled 'X DFO ELOG' is also present. A light blue bar below the header contains a back arrow and the text 'Back to Logs'. The main content area shows a list of trap groups. The first group, 'Trap Group 1', is expanded to show various input fields: 'GRID' with a dropdown menu showing '1GV40', 'ESTIMATED KEPT WEIGHT (LBS)' with a text field containing '400', 'TRAP HAULS' with a text field containing '250', 'SOAK DURATION (DAYS)' with a text field containing '2', 'NUMBER OF SPECIMENS DISCARDED' with a text field containing '8', a blue button labeled 'Capture GPS' with a location pin icon, 'LATITUDE' with a text field containing '49.2150', and 'LONGITUDE' with a text field containing '-65.9420'. The second group, 'Trap Group 2', is partially visible at the bottom.

A Quebec trap group, showing Capture GPS with a latitude and longitude entered by hand

12. Changing the Language

LobsterLog is available in English and French.

1. Tap **Settings**.
2. Tap Language.
3. Choose English or French. The app reloads in your chosen language.

13. Working Offline

Everything in LobsterLog is stored on your own phone. You can create, edit, and review your logbook entries with no internet connection at all. A connection is only needed when you actually send an entry to DFO.

The Provider's Instructions, the DFO Instructions 234.7, and all the app's help are kept on your phone, so you can reach them any time — even with no signal, as DFO requires.

14. Getting Help

This guide is also inside the app. Tap **Help** at the top of the DFO ELOGs screen, then **User's Guide** — it is stored on the device, so it works with no connection.

14.1 LobsterLog app support

Contact LobsterLog for anything to do with using the app — setup, your ELOG key, how a feature works, GPS entry, or technical trouble.

Email: support@lobsterlog.com

Phone / text: 1 (902) 635-1069

Website: lobsterlog.ca

We usually reply within a day.

14.2 DFO Client Support

Contact DFO for corrections to reports you've already sent, to get your ELOG key, and for licensing or regulatory questions.

Phone: 1-877-535-7307

Hours: Monday to Friday, 8:00 a.m. to 9:00 p.m. Atlantic time

Website: dfo-mpo.gc.ca/elogs

One tool, one job done

Fill in your log at sea. Close your sections. Send it when you're back in range. That's the whole job — and LobsterLog keeps everything safe on your phone until it's done.
