1. Before You Start

This guide walks you through using LobsterLog to file your electronic logbook (ELOG) with Fisheries and Oceans Canada (DFO). It covers everything from first setup to sending your catch report, plus the two extra forms DFO requires: the Marine Mammal report (Form 222) and the Inactivity report (Form 233).

You do not need to be good with phones to use this guide. Each step tells you exactly what to tap. If you get stuck, the support number is at the back.

What you'll need before you begin

Your smartphone (iPhone or Android) with LobsterLog installed.

Your DFO Licence Number, your Licence Holder's FIN, and your Vessel Number (VRN) — all exactly as they appear on your licence.

Your ELOG Key from DFO. If you don't have it, call DFO Client Support at 1-877-535-7307.

An internet or cell connection — needed only when you send to DFO, not while you fill in your log.

A note on regions: LobsterLog works in all four Atlantic regions. The app shows you only the fields your region requires — so what you see on your screen may be slightly different from what another fisherman in another region sees. That is normal and correct.

2. Installing and Opening LobsterLog

2.1 Download the app

LobsterLog is free to download. It works on iPhone (iOS 14 or newer) and Android (version 8 or newer).

1. Open the App Store (iPhone) or Google Play Store (Android).
2. Search for LobsterLog.
3. Tap Get or Install and wait for it to finish.
4. Tap Open, or find the lobster icon on your home screen and tap it.

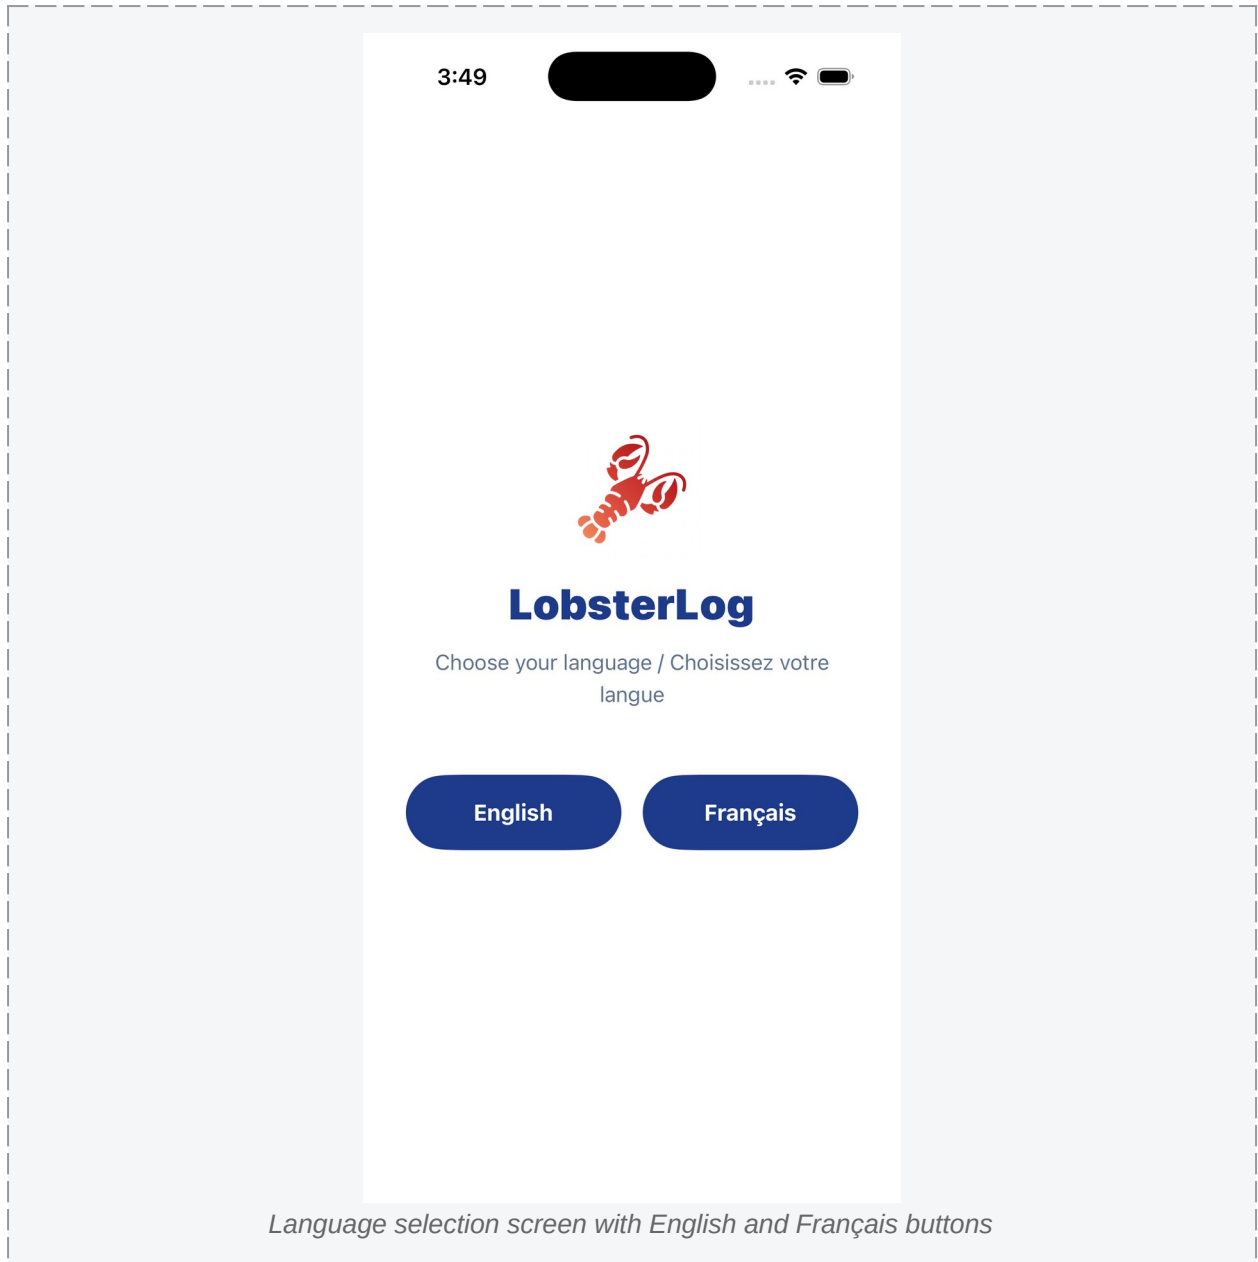

[SCREENSHOT]

App Store / Google Play listing for LobsterLog

Figure pending — external capture of the store listing (not an app screen); to be added when the DFO ELOG release is live on the App Store and Google Play.

2.2 Choose your language

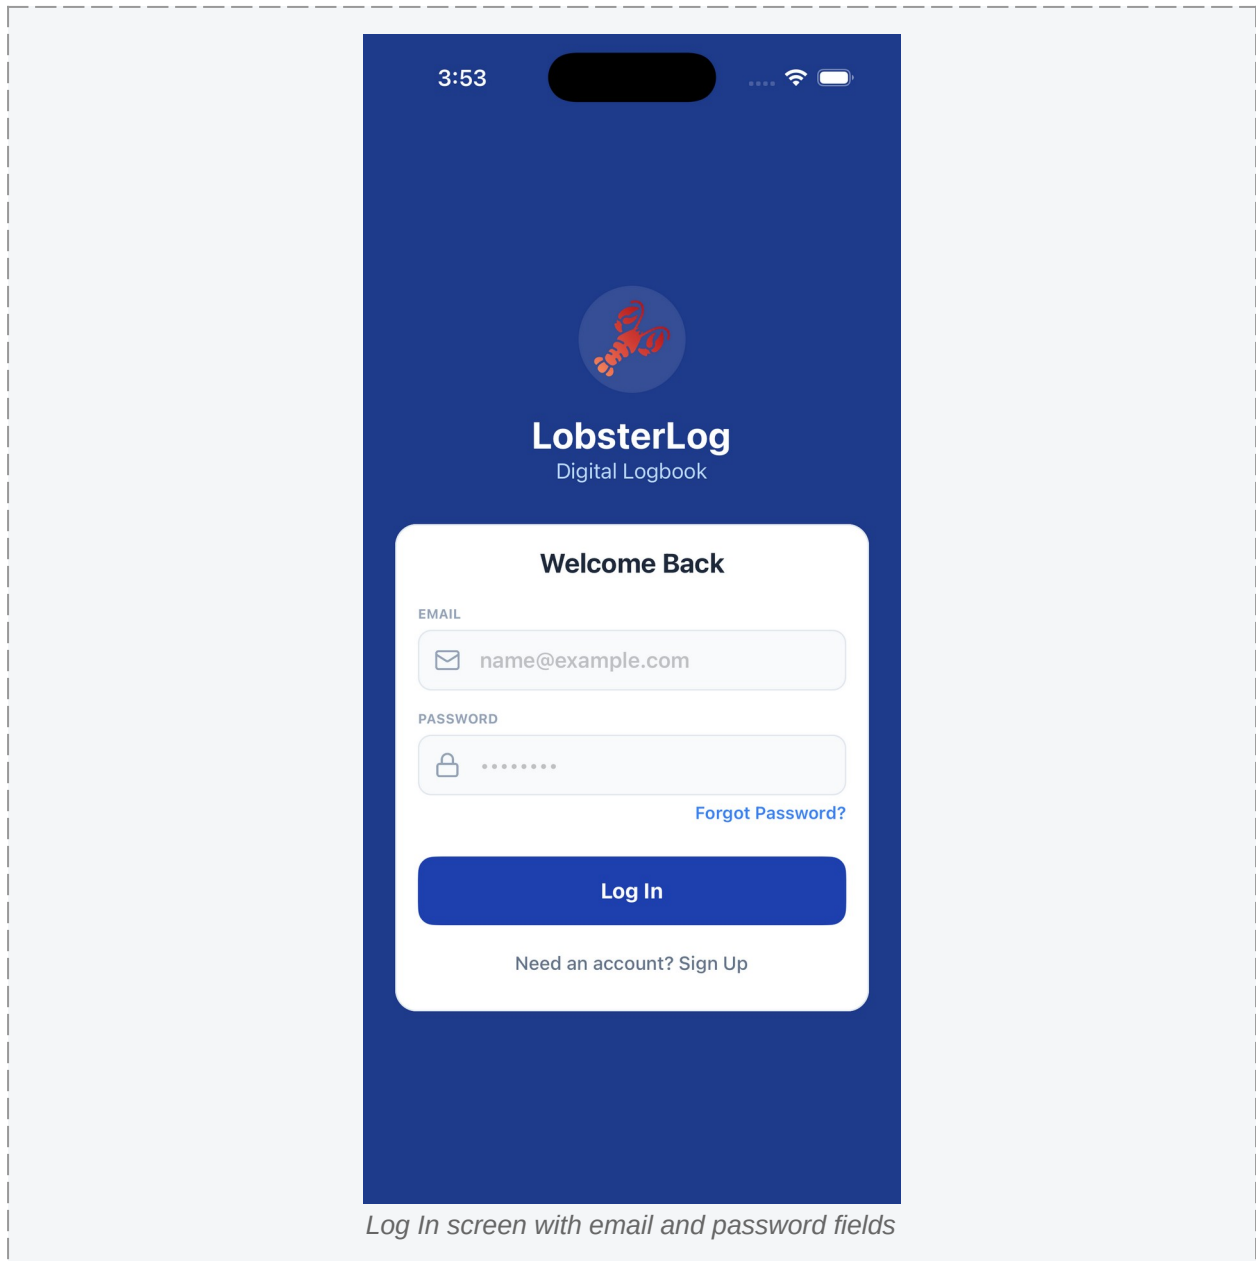

The first time you open LobsterLog, it asks you to choose your language. Tap **English** or **Français**. You can change this later at any time (see Section 11).

Language selection screen with English and Français buttons

2.3 Log in

LobsterLog uses an account to keep your logbook safe. Enter your email address and password, then tap **Log In**.

3. Activating DFO ELOG

DFO ELOG is the part of the app that files your official logbook. You turn it on once, for your region, using the key DFO gave you.

3.1 Open DFO ELOG Setup

1. From the main screen, tap the red **DFO ELOG** button at the top.
2. The DFO ELOG Setup screen opens. (Once you have activated, this same button takes you to your DFO Logs list instead.)

The screenshot shows the main screen of the LobsterLog app. At the top, there is a dark blue header bar. On the left, it says "Demo Vessel" with a lobster icon and "Capt. LobsterLog Demo". On the right, there are icons for a crown, a line graph, and a gear, and a prominent red button labeled "DFO ELOG". Below the header, there is a date selector showing "Sun, Jul 19" and "2026". Underneath, there are two summary cards: "DAYS OUT" showing "0 This season" and "THIS WEEK" showing "0 Sun - Sat". The main section is titled "Daily Log" and contains several input fields: "LBS CAUGHT" (0), "PRICE / LB" (\$0.00), "WATER TEMP" (---), and "WIND (KTS)" (---). Below these are buttons for "WIND DIRECTION" (N, NE, E, SE, S, SW) and "CONDITIONS" (Sunny, Cloudy, Rain, Fog, V). At the bottom, there is a "NOTES" section with a text area containing "Crew, gear issues...".

Main screen with the red DFO ELOG button at the top

3.2 Enter your region and licence details

1. Select your region: **Quebec (QC)**, **Gulf (GLF)**, **Maritimes (MAR)**, or **Newfoundland & Labrador (NL)**.
2. Enter your Fishing Licence Number, exactly as on your licence.
3. Enter your **Licence Holder's FIN**, exactly as on your licence.

Don't have your ELOG Key?

Call DFO Client Support at 1-877-535-7307 (Monday to Friday, 8:00 a.m. to 9:00 p.m. Atlantic time), or visit dfo-mpo.gc.ca/elogs.

Activate DFO ELOG

Already activated? Restore Purchase

(b)

DFO ELOG Setup screen with region picker, Licence Number, and FIN fields

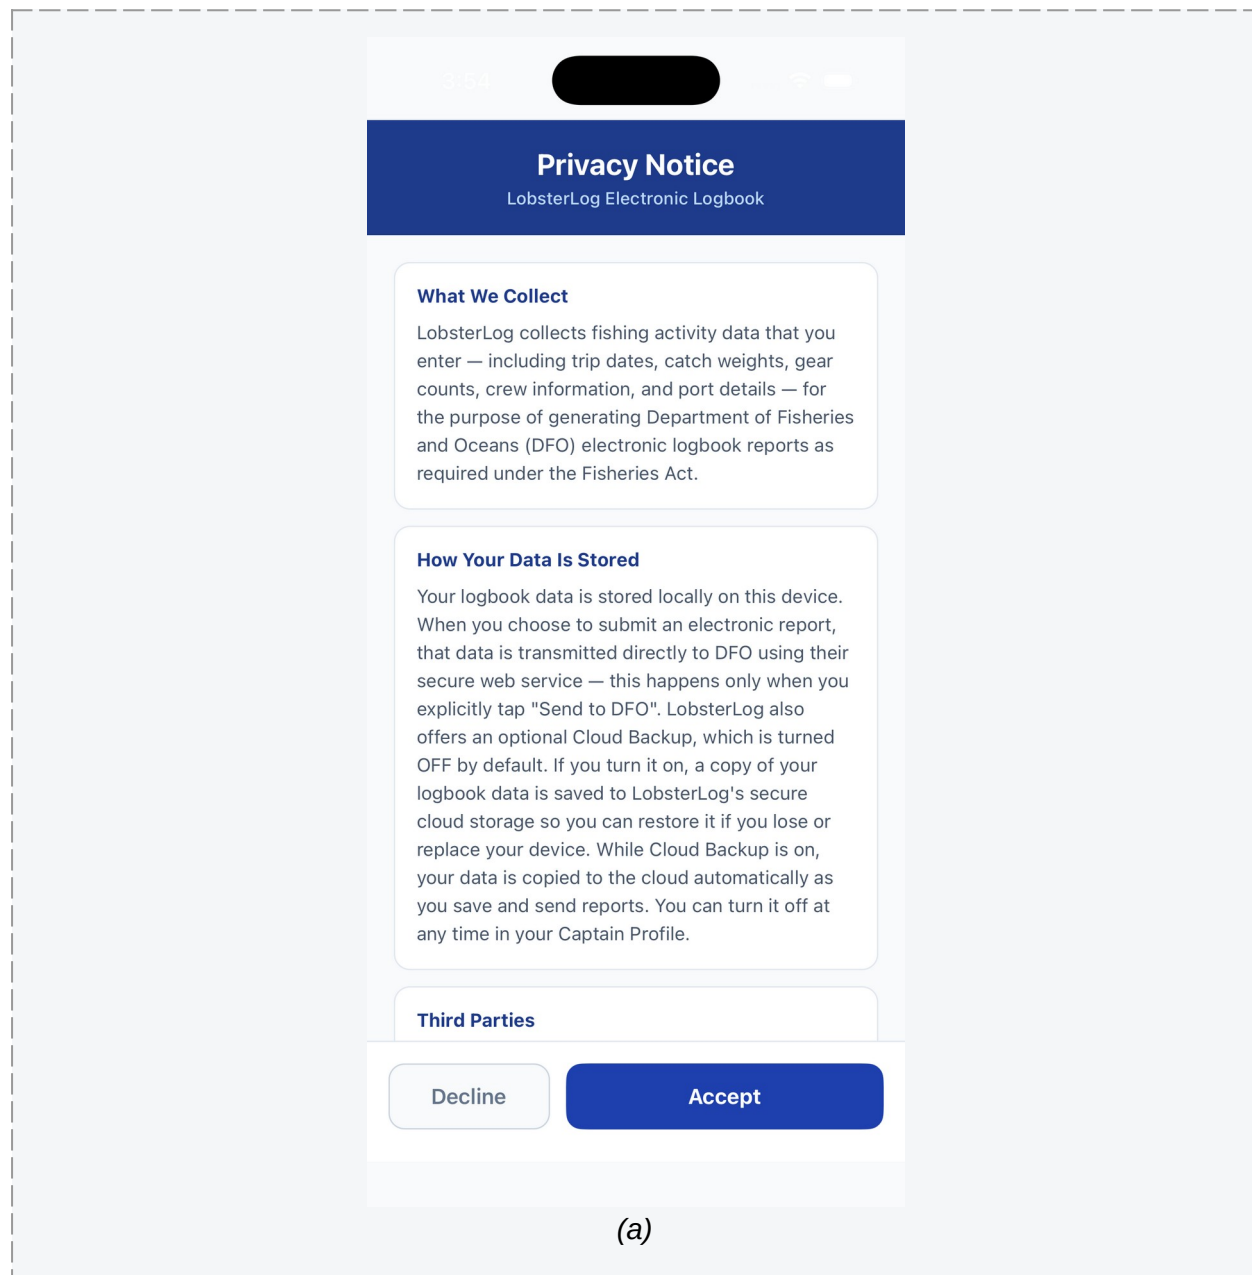

3.3 Activate

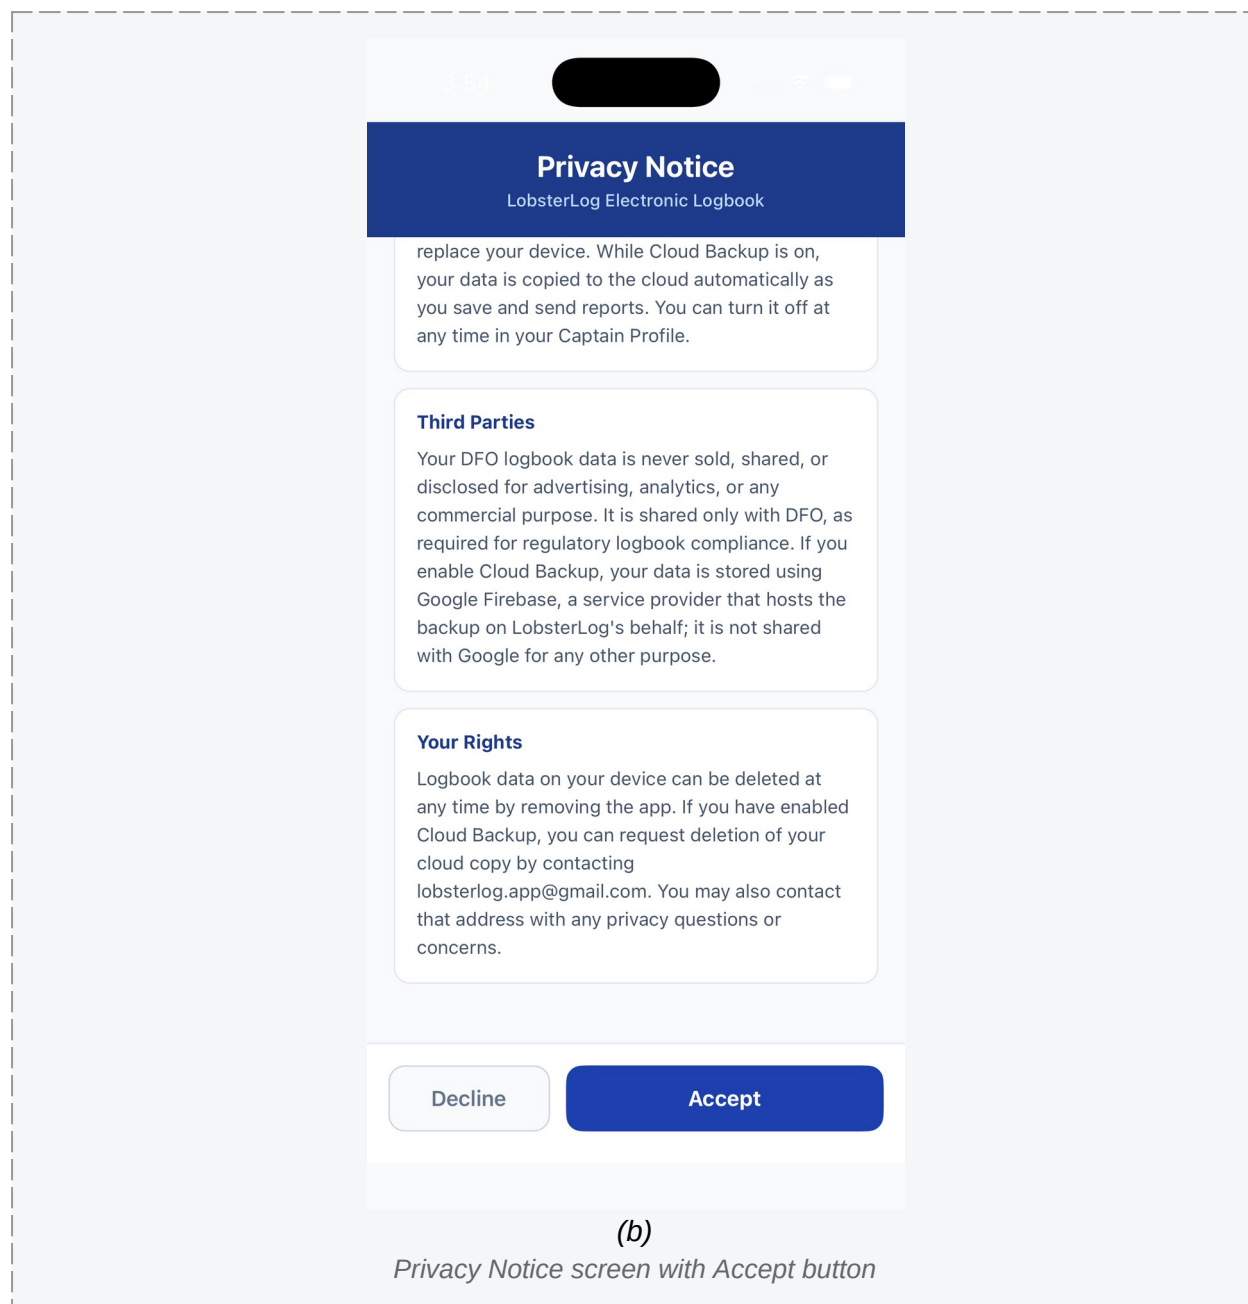

1. Tap **Activate DFO ELOG**.
2. Complete the in-app purchase for the DFO ELOG Season Pass.
3. *Note for DFO reviewers: demo and reviewer accounts activate without the purchase step — the Season Pass applies to regular harvester accounts only.*

Once activated, the DFO ELOG features unlock and you're ready to file your first logbook.

3.4 First activation — Privacy Notice

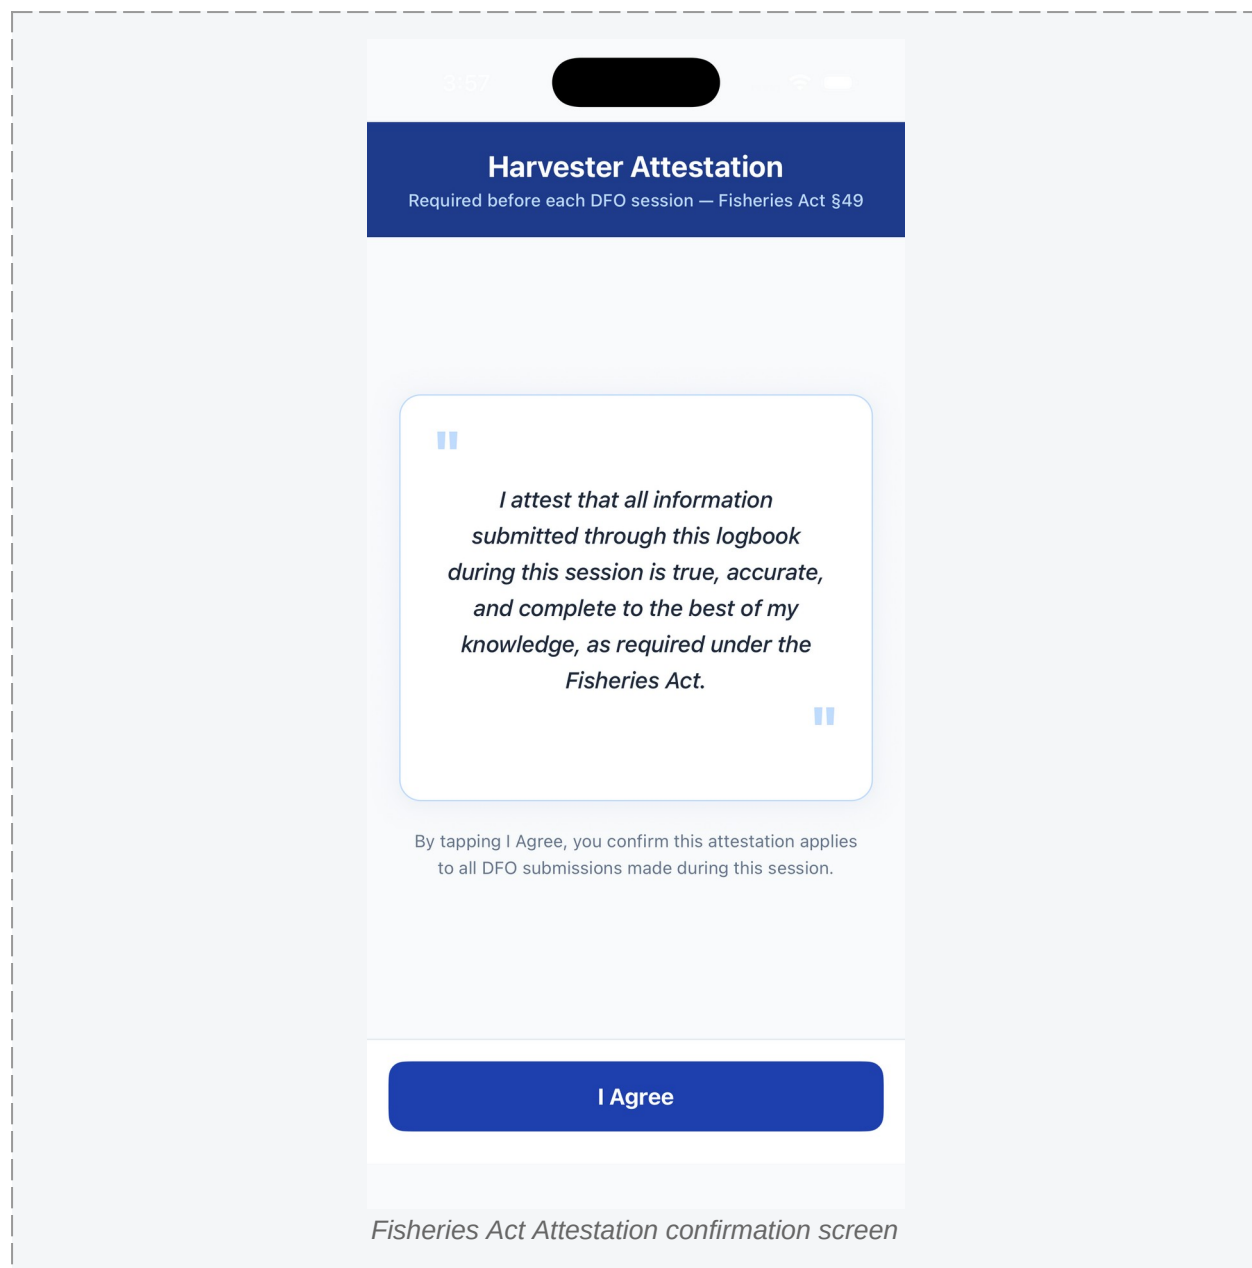

The first time you open your DFO Logs list after activating, LobsterLog shows a Privacy Notice. Read it and tap Accept to continue. It is shown once per device.

3.5 The attestation

Each time you restart the app and open the DFO ELOG section, you'll be asked to confirm a Fisheries Act Attestation. This is you certifying that the information you enter is true, accurate, and complete. DFO requires this. Tap to confirm and you're in.

4. Setting Up Your Captain Profile

Before you can file a logbook, LobsterLog needs to know who you are and which boat you fish. You enter this once. The app uses it on every report it sends to DFO, so it must be correct.

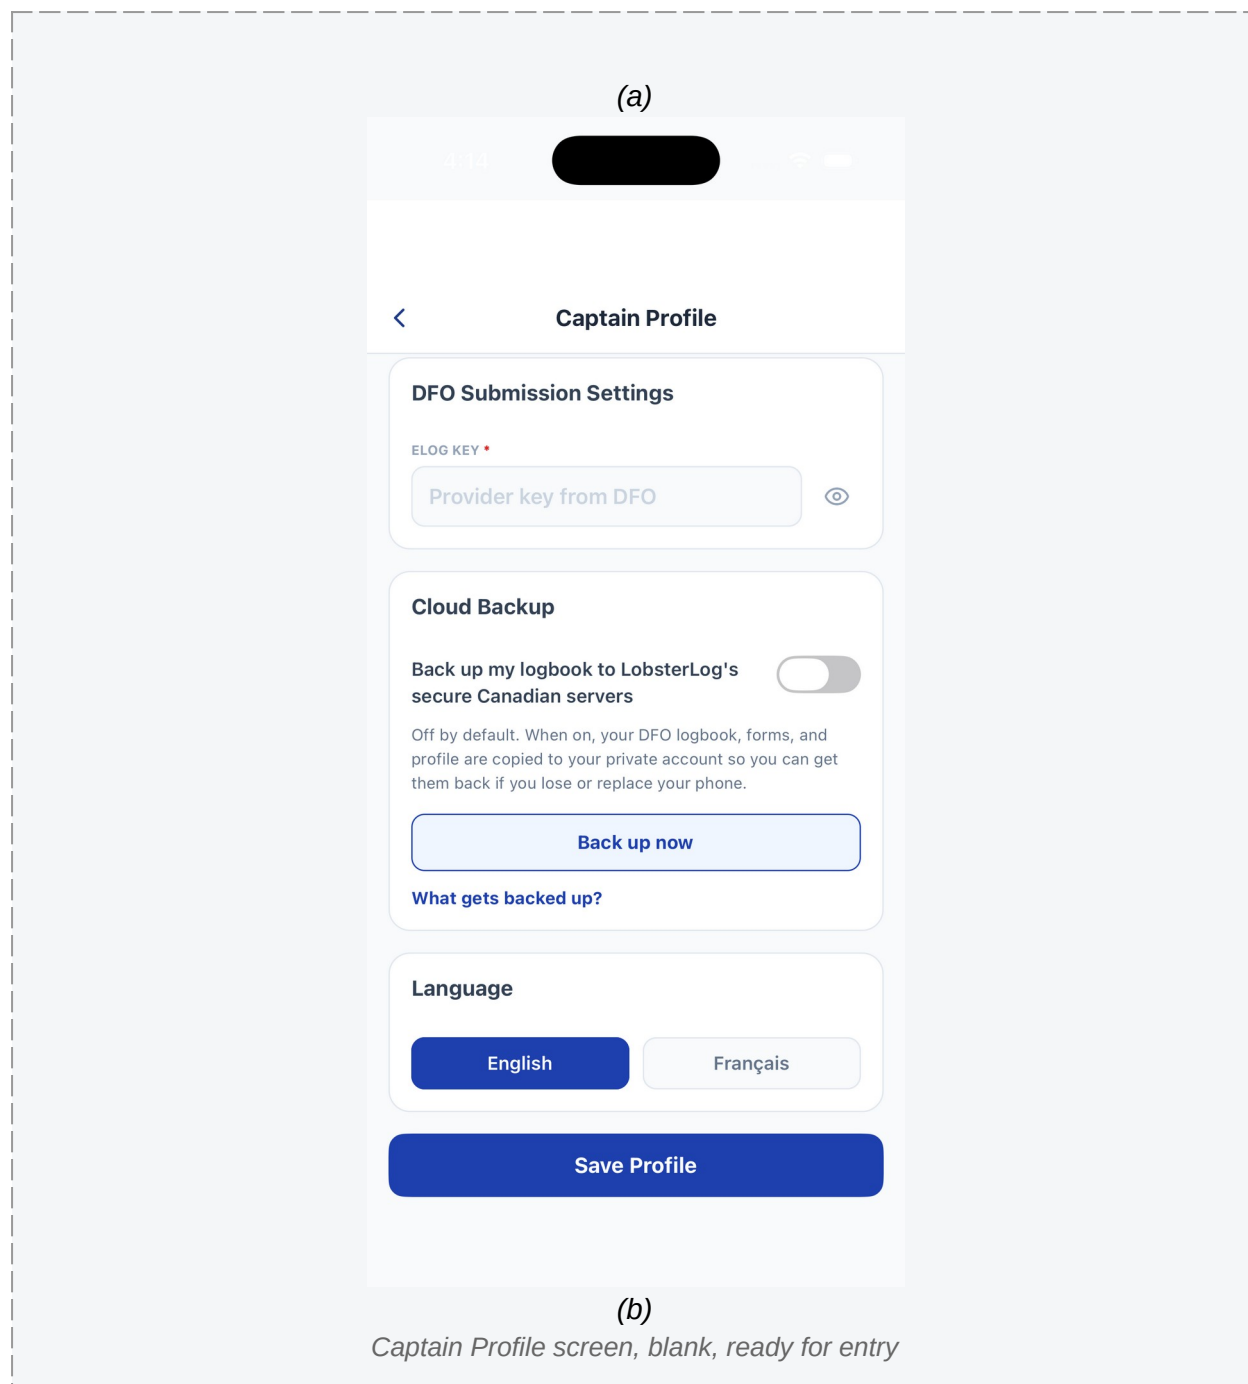

Why this matters

These values go into every submission to DFO. If a single digit is wrong, DFO will reject your report. Enter everything exactly as it appears on your licence.

4.1 Open your profile

1. From your DFO Logs list, tap the **Profile** button.
2. Tap into each field and type your information.

The screenshot shows a mobile app interface for the 'Captain Profile' section. At the top, there's a status bar with the time '4:01' and a home indicator. Below it is a navigation bar with a back arrow and the title 'Captain Profile'. The main content area is titled 'Vessel & Licence Details' and contains several input fields, each with a red asterisk indicating a required field. The fields are: 'OPERATOR NAME' with a placeholder 'Full name of operator'; 'LICENCE HOLDER'S FIN' with a placeholder 'Fisher Identification Number'; 'VESSEL NUMBER (VRN)' with a placeholder 'e.g. 123456'; 'FISHING LICENCE NUMBER' with a placeholder 'e.g. T-123456'; 'FISHING AREA (E.G. LFA 34)' with a dropdown menu showing 'Select fishing area...' and a downward arrow; 'TOTAL # OF FISHING GEAR' with a placeholder 'e.g. 375'; and 'GEAR TYPE (E.G. POT/TRAP)' with a placeholder 'e.g. Pot/Trap'. The form is set against a light gray background with a dashed border.

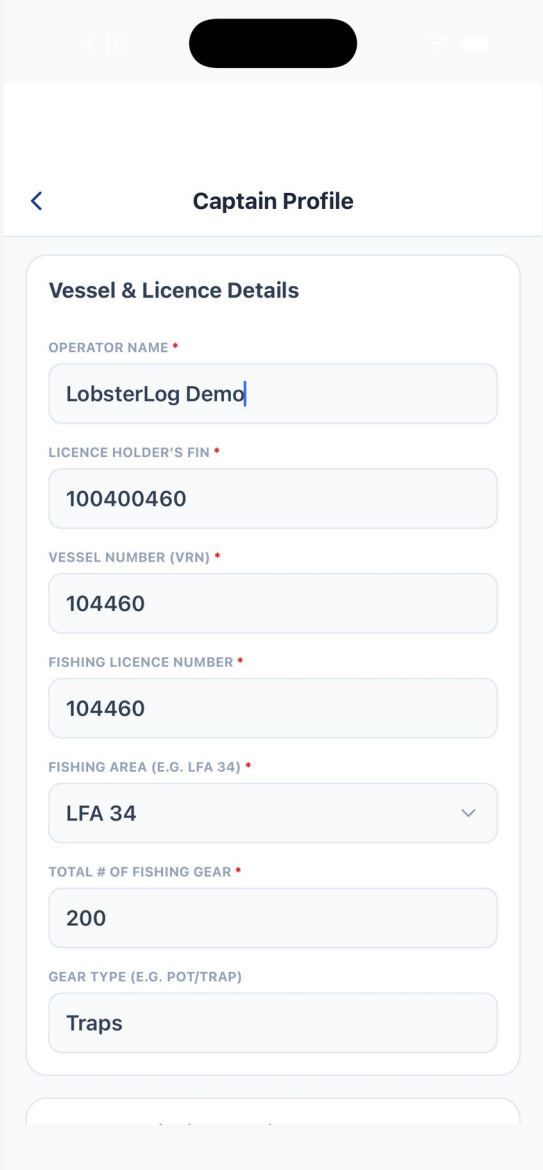

4.2 Fill in your details

Enter the following:

- Operator Name — your full name.
- Vessel Name — the name of your boat.
- Vessel Number (VRN) — your vessel's registration number, exactly as on your licence.
- Home Port and location details.

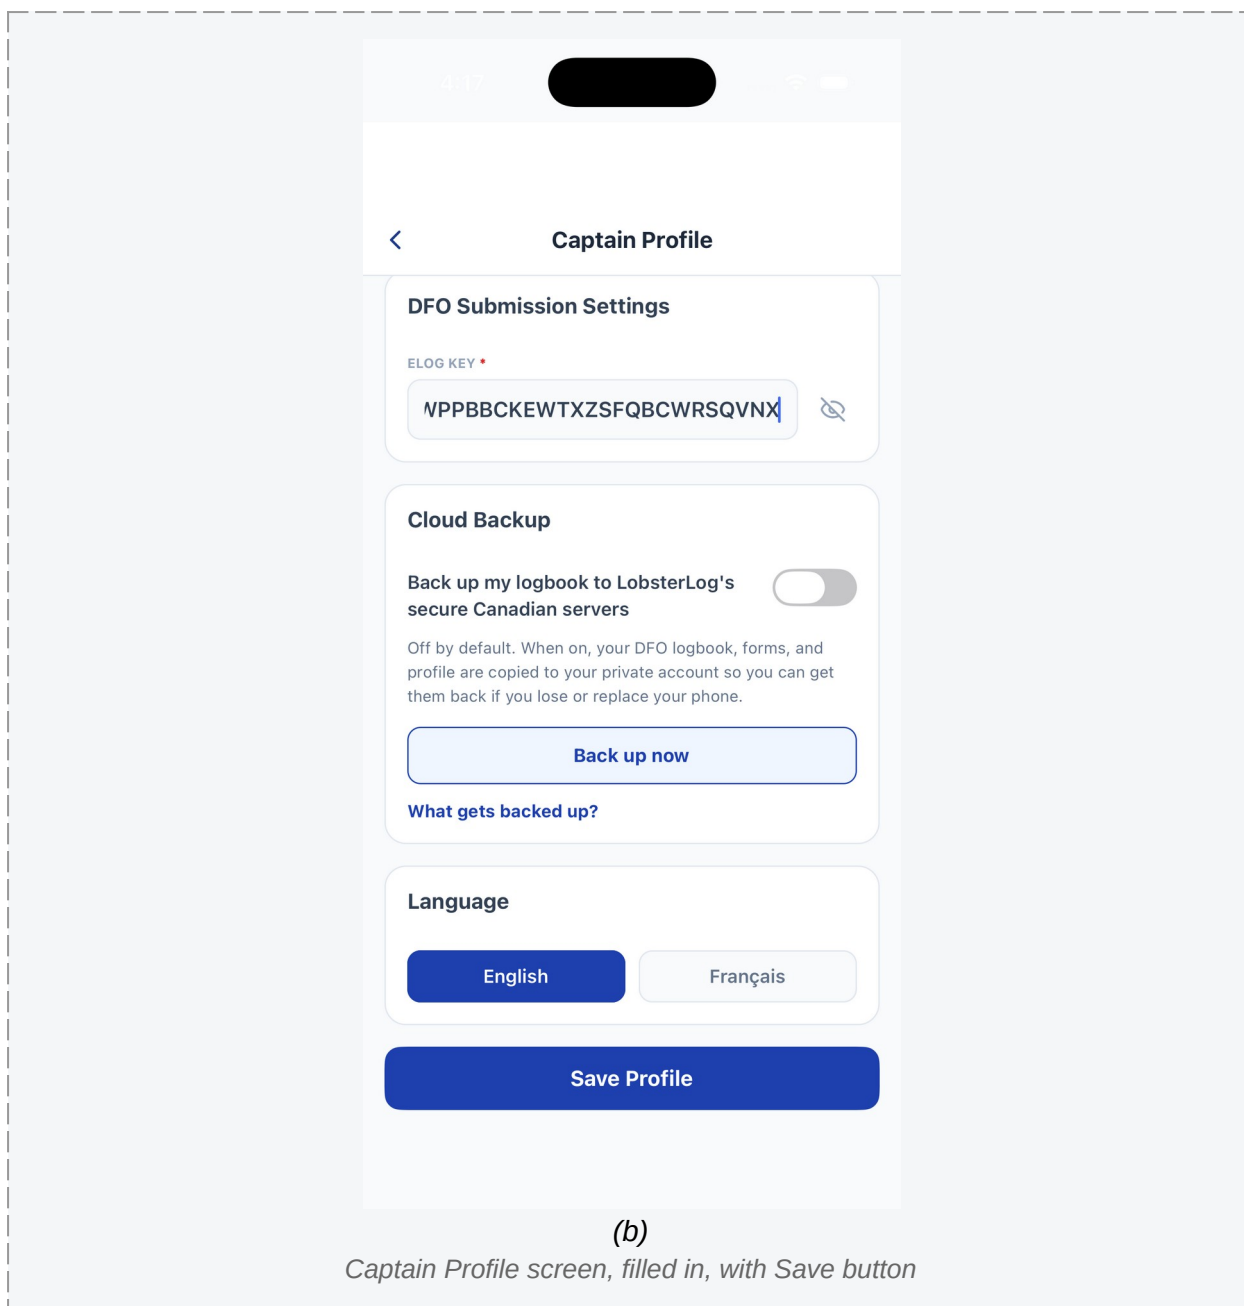

- ELOG Key — provided by DFO. The app uses it to sign every submission.

Tap Save when you're done. Your profile is now stored on your phone.

The screenshot shows a mobile app interface for editing a 'Captain Profile'. The form is titled 'Vessel & Licence Details' and contains several input fields, each with a red asterisk indicating a required field. The fields are: 'OPERATOR NAME' (text input with 'LobsterLog Demo'), 'LICENCE HOLDER'S FIN' (text input with '100400460'), 'VESSEL NUMBER (VRN)' (text input with '104460'), 'FISHING LICENCE NUMBER' (text input with '104460'), 'FISHING AREA (E.G. LFA 34)' (dropdown menu with 'LFA 34'), 'TOTAL # OF FISHING GEAR' (text input with '200'), and 'GEAR TYPE (E.G. POT/TRAP)' (text input with 'Traps'). The form is set against a light blue background with a dashed border. Below the form, the label '(a)' is centered.

(a)

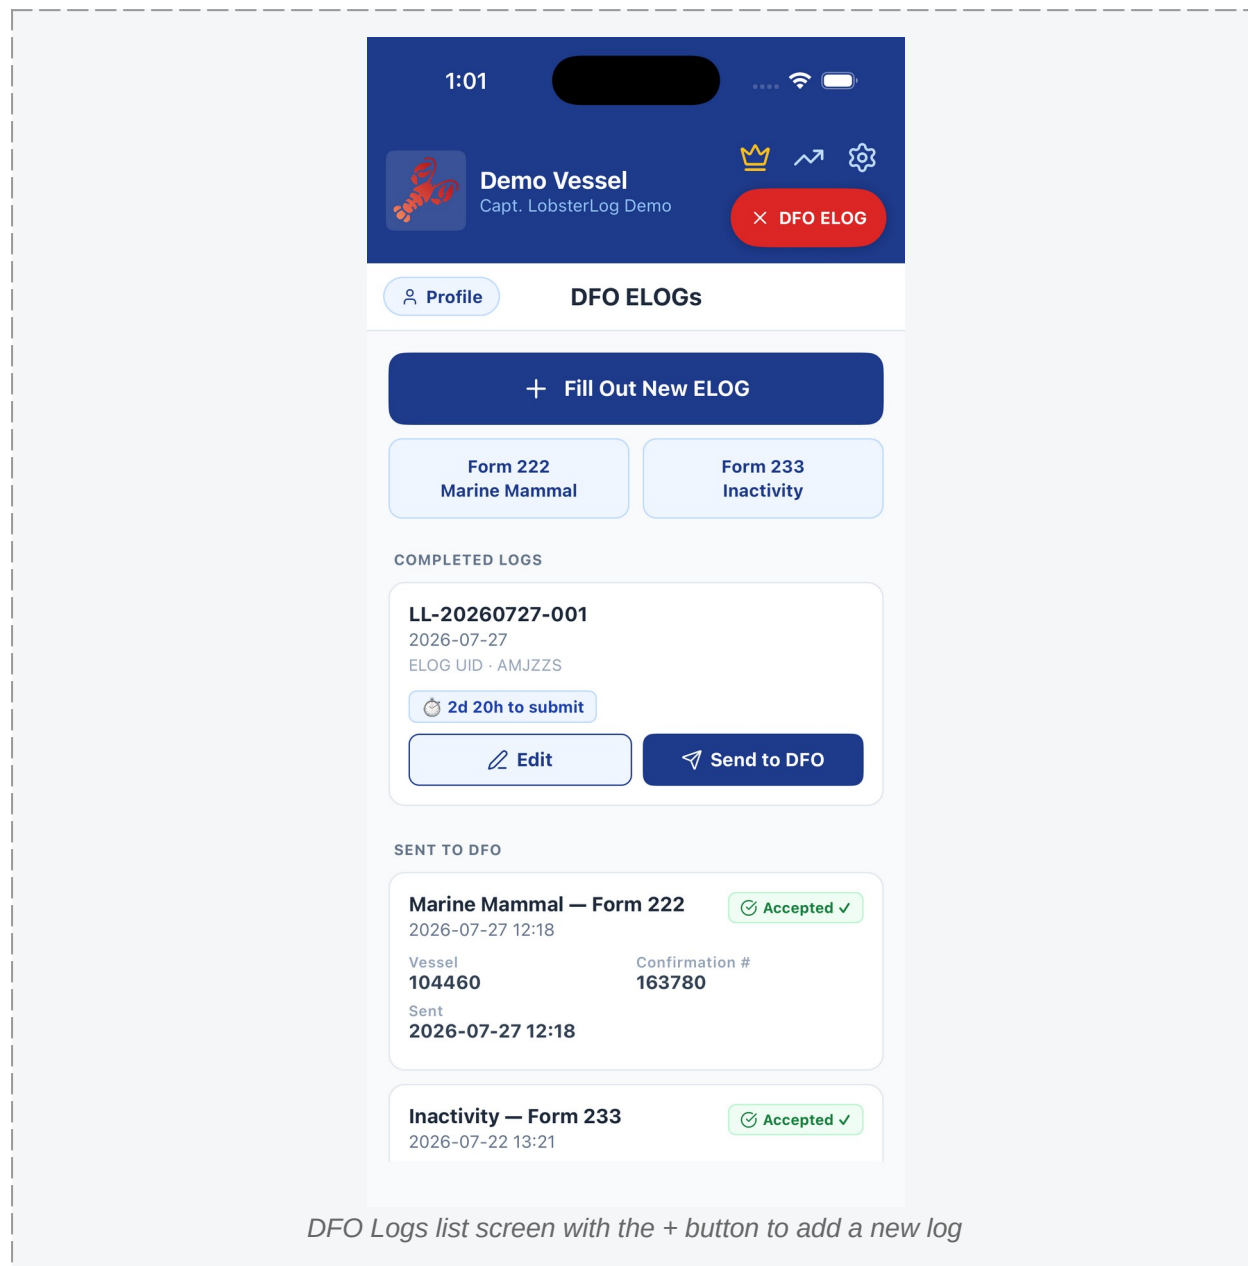

5. Creating a Logbook Entry (Form 234)

Each fishing trip is one logbook entry. You build it section by section. Everything saves to your phone as you go — you do not need a connection until you send it to DFO at the end.

5.1 Start a new entry

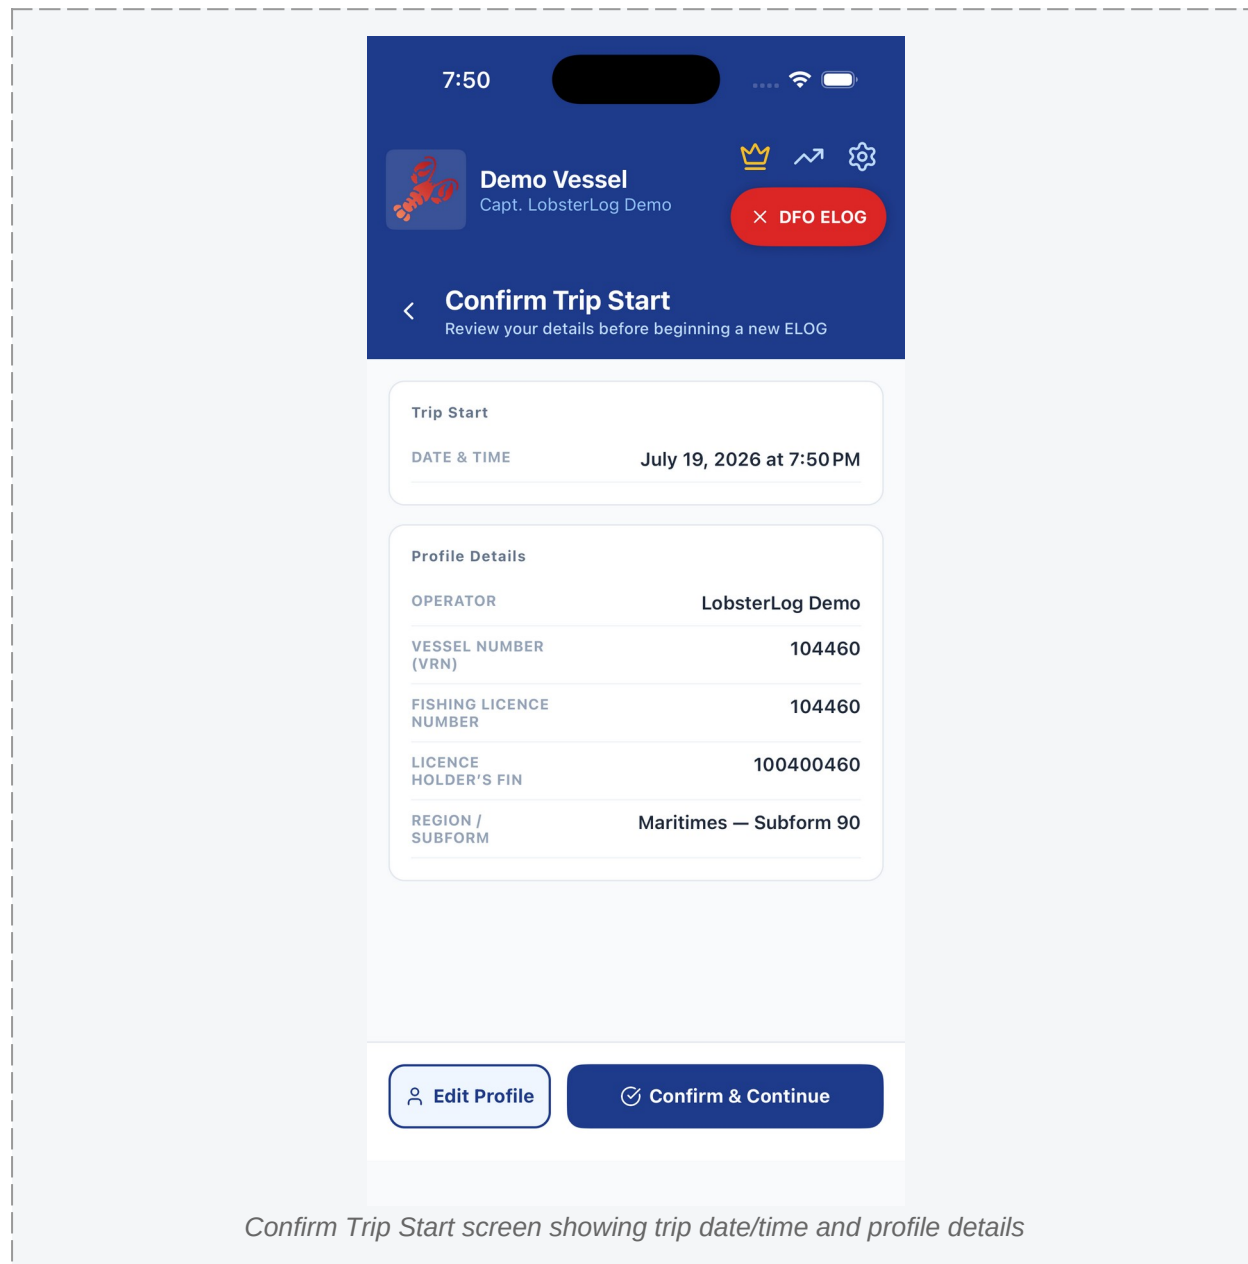

1. From the main screen, tap DFO Logs.
2. Tap the + button to begin a new entry.

5.2 Confirm your trip start

Before the form opens, LobsterLog shows you a Confirm Trip Start screen. This is a quick check that your profile details are right before you begin. Look over your operator name, Vessel Number (VRN), Fishing Licence Number, Licence Holder's FIN, and region.

1. If everything is correct, tap **Confirm & Continue**.
2. If something is wrong, tap **Edit Profile** to fix it first.

5.3 Timestamps

The Timestamps section records the key times of your trip. Tap each field and set the date and time. The fields marked with a red star (*) are required.

- Time Sailed — when you left the wharf.

- Time Started Hauling — when you began hauling your first trap.
- Time Stopped Hauling — when you finished hauling.
- Time of Landing — when you landed your catch.

Tip

Set your phone's own date and time correctly before you start. LobsterLog uses your phone's clock for these timestamps.

The screenshot shows the LobsterLog app interface. At the top, the status bar displays 7:55, a black pill-shaped notch, and icons for signal, Wi-Fi, and battery. Below the status bar is a dark blue header with a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and icons for a crown, a line graph, and a gear. A red button labeled "X DFO ELOG" is on the right. Below the header is a light blue bar with a back arrow and the text "Back to Logs". Underneath is a dropdown menu labeled "Select port landed...". The main content area has two sections. The first section is titled "Timestamps" with a clock icon and an "Add a note" button. It contains four time fields: "TIME SAILED *" with "Jul 19, 05:00", "TIME STARTED HAULING *" with "Jul 19, 07:00", "TIME STOPPED HAULING *" with "Jul 19, 11:00", and "TIME OF LANDING *" with "Jul 19, 12:30". Each field has a clock icon on the right. The second section is titled "Catch & Effort" with a scale icon and an "Add a note" button. It contains three fields: "FISHING AREA (LFA) *" with "LFA 34", "LOBSTER SETTLEMENT GRID" with "Select grid...", and "LOBSTER CATCH WEIGHT (LBS) *". Each field has a dropdown arrow on the right.

Timestamps section with the four time fields

5.4 Catch & Effort

This section records where and how you fished, and what you caught. Fill in:

- Fishing Area (LFA) — choose your lobster fishing area from the list.
- Lobster Settlement Grid — choose your grid (this appears in the Maritimes region).
- Number of Traps Hauled.
- Set and Haul Coordinates — the app can read your phone's GPS automatically, or you can type them in by hand.
- Soak Time — how long your traps soaked (this appears in Quebec, Gulf, and Newfoundland & Labrador; it is not used in the Maritimes).
- Targeted Species.
- Lobster Catch Weight — enter the weight in pounds; the app converts it for DFO.

The screenshot shows the LobsterLog app interface on a mobile device. At the top, the status bar shows 7:57, a black pill-shaped notch, and icons for signal, Wi-Fi, and battery. The app header is dark blue with a lobster icon, the text 'Demo Vessel' and 'Capt. LobsterLog Demo', and icons for a crown, a line graph, and settings. A red button labeled 'X DFO ELOG' is on the right. Below the header is a light blue bar with a back arrow and 'Back to Logs'. A date and time selector shows 'Jul 19, 12:30' with a clock icon. The main section is titled 'Catch & Effort' with a green icon and an 'Add a note' button. It contains four input fields: 'FISHING AREA (LFA) *' with 'LFA 34', 'LOBSTER SETTLEMENT GRID' with '122', 'LOBSTER CATCH WEIGHT (LBS) *' with '250', and 'TRAP HAULS *' with '200'. Below this is a 'Bait Reporting *' section with a red icon, an 'Add a note' button, and a dashed box containing '+ Add Bait'. At the bottom is a 'GPS Coordinates' section with a location icon. A caption at the bottom reads: 'Catch & Effort section showing Fishing Area, grid, and catch weight'.

Catch & Effort section showing Fishing Area, grid, and catch weight

5.5 Bait

The Bait section is required in every region. For each bait you used, enter:

- Bait Type — choose from the list for your region.
- Bait Condition — fresh, frozen, salted, and so on.
- Weight of bait used.

You can add more than one bait. When you've finished the bait section, tap Close Section (see Section 6).

The screenshot shows the LobsterLog app interface. At the top, the status bar displays 7:59, a blacked-out location, and signal/battery icons. The app header includes a lobster icon, 'Demo Vessel', 'Capt. LobsterLog Demo', and a red 'DFO ELOG' button. Below the header is a 'Back to Logs' link. The main content area has input fields for '250' and '200' under the heading 'TRAP HAULS *'. The 'Bait Reporting *' section is active, showing 'No bait added yet.' and an 'Add a note' button. An 'Add Bait' modal is open, featuring three dropdown menus: 'BAIT TYPE' (Mackerel, Atlantic), 'CONDITION *' (Frozen), and 'WEIGHT (LBS)' (40). At the bottom of the modal are 'Add Entry' and 'Cancel' buttons.

(a)

The screenshot shows the LobsterLog mobile app interface. At the top, the status bar displays the time 7:59, signal strength, Wi-Fi, and battery icons. The app header is dark blue with a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and a red button labeled "DFO ELOG". Below the header is a light blue bar with a back arrow and "Back to Logs". The main form has three sections: 1. "LOBSTER CATCH WEIGHT (LBS) *" with a text input containing "250". 2. "TRAP HAULS *" with a text input containing "200". 3. "Bait Reporting *" with a red lobster icon, an "Add a note" button, a list item "Mackerel, Atlantic" with "40 lbs" and a trash icon, and a dashed box with "+ Add Bait". Below this is a "GPS Coordinates" section with a "Capture GPS" button, "LATITUDE" input with "0.0000", and "LONGITUDE" input with "0.0000".

(b)

Bait section with type, condition, and weight

5.6 Sections that depend on your region

Some sections appear only for certain regions. If you don't see one of these, it's because your region doesn't require it:

- Hail In / Hail Out — Maritimes only, and only for certain fishing areas. Record your hail company and confirmation number when required.
- Transfer — Quebec only. Record any at-sea transfer of catch when required.
- Crew Number — Quebec and Maritimes.
- Port of Departure — Quebec and Newfoundland & Labrador.

- Port of Landing — all regions.
- Gear Subtype — Newfoundland & Labrador only.

This is by design

LobsterLog only ever shows you the fields your own region requires. You will never be asked to fill in something that doesn't apply to you.

6. Closing Sections

DFO requires that each section of your log be formally closed before you send it. Closing a section stamps the time and locks it so it can't be changed by accident.

1. When you've finished a section, tap **Close Section**.

When a section is closed:

- The closing time is recorded automatically and included in your submission.
- The section locks and shows as read-only.
- You can no longer change it inside the app.

If you closed a section by mistake

Contact LobsterLog support at support@lobsterlog.com. Do not try to delete and re-enter a closed section. Corrections to data require DFO approval.

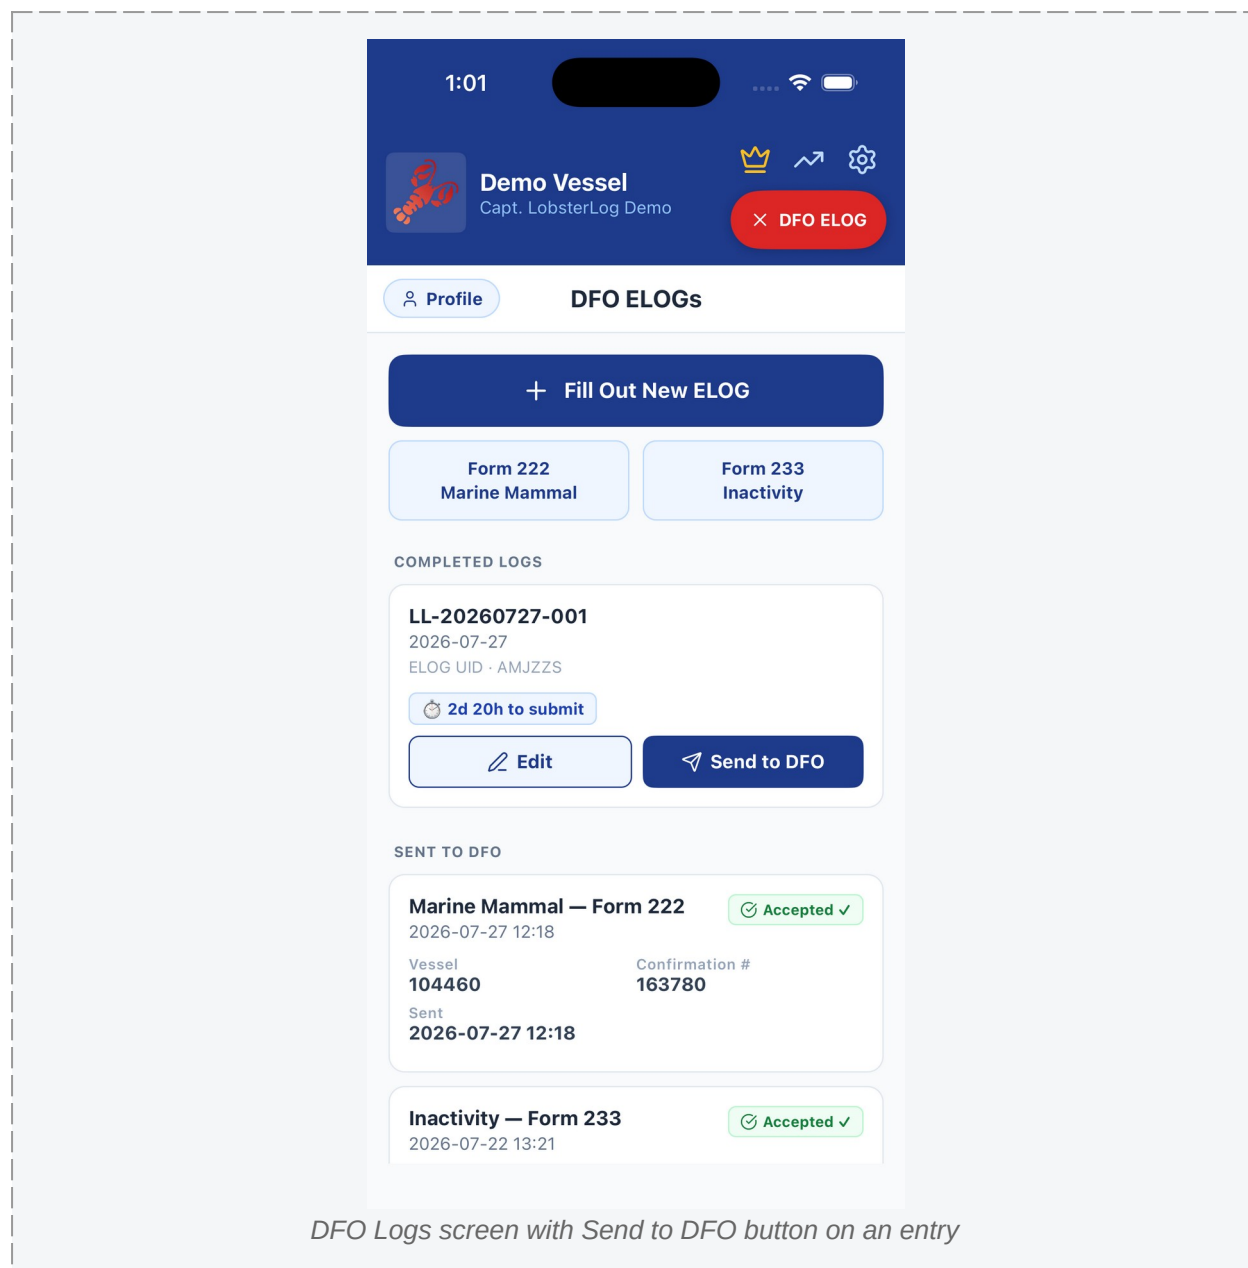

7. Sending Your Logbook to DFO

Once every required section is filled in and closed, your entry is ready to send. You need an internet or cell connection for this step.

1. Go to the DFO Logs screen.
2. Find the entry you want to send and tap **Send to DFO**.

Before it sends, LobsterLog automatically:

- Checks your entry against DFO's rules. If something is missing or wrong, it tells you so you can fix it before sending.
- Encrypts and signs your submission using your ELOG Key.
- Records the submission in your transmission register, kept on your phone for three years.

7.1 If a send fails

If your report doesn't go through — usually because you're out of range — LobsterLog tells you and keeps your log safe.

- A red badge appears on the entry showing the last send failed.
- Your data is *not* lost. Tap **Retry** once you're back in range.
- If it keeps failing, note the error code shown and contact LobsterLog support.

Out of range is fine

You can fill in your whole log at sea with no signal. It saves to your phone. You only need a

connection at the moment you send — and if that fails, your log waits safely until you tap Retry.

8. Form 222 — Marine Mammal Report

You must file Form 222 whenever you have an interaction with a marine mammal during a trip. This is sent to DFO separately from your logbook.

1. Go to the DFO Logs screen.
2. Tap **Marine Mammal Report (Form 222)**.
3. Fill in all required fields: date, species, type of interaction, and location.
4. Tap **Submit to DFO**.

Like your logbook, Form 222 is saved in your transmission register. If a submission fails, use the Retry button.

The 'Remarks (Optional)' section includes an 'EVENT DESCRIPTION' field with 'Demo submission - test report' and a 'REMARK' field with 'Photos taken and retained on board'. A text area below the remark field contains the text: 'Whale surfaced near the traps and became lightly entangled in the buoy line; released without injury.' At the bottom, there is a blue 'Submit to DFO' button.

(f)

Form 222 — Marine Mammal Report entry screen

9. Form 233 — Inactivity Report

You file Form 233 when you have not fished during a reporting period. It tells DFO that you were inactive, so your reporting stays complete.

1. Go to the DFO Logs screen.
2. Tap **Inactivity Report (Form 233)**.
3. Enter the start and end dates of the period you didn't fish (format: YYYY-MM-DD).
4. Choose the reason for inactivity from the list.
5. Tap **Submit to DFO**.

The screenshot shows a mobile application interface for 'Form 233 · Inactivity'. The top status bar shows the time 13:05. The app header has a back arrow and the title 'Form 233 · Inactivity'. The form is divided into two main sections: 'Licence Details' and 'Reporting Period'. The 'Licence Details' section contains three input fields: 'OPERATOR NAME' with the value 'LobsterLog Demo', 'FISHING LICENCE NUMBER' with the value '104460', and 'LICENCE HOLDER'S FIN' with the value '100400460'. The 'Reporting Period' section contains two date pickers: 'START DATE' with the value '2026-07-01' and 'END DATE' with the value '2026-07-15'. Below the date pickers is a button labeled 'Add a note'. At the bottom of the form is a field labeled 'Referred ELOG UID'. The entire form is enclosed in a dashed border, and the label '(a)' is centered below it.

10. GPS and Coordinates

LobsterLog can read your phone's GPS to fill in your set and haul positions automatically. The first time, allow location access when the app asks.

If GPS isn't available, or you'd rather type your positions in, tap the coordinate field and enter your latitude and longitude in decimal degrees — for example, 43.4567 N, 65.7890 W. Your coordinates must fall within the valid range for your fishing area.

The screenshot displays the LobsterLog app interface on a mobile device. At the top, the status bar shows the time as 8:01 and various icons. The app header includes a lobster icon, the text "Demo Vessel" and "Capt. LobsterLog Demo", and a red button labeled "DFO ELOG". Below the header is a "Back to Logs" link. The main content area is divided into three sections: "Bait Reporting" with a list item "Mackerel, Atlantic" (40 lbs) and an "Add Bait" button; "GPS Coordinates" with a "Capture GPS" button and input fields for "LATITUDE" (43.4426) and "LONGITUDE" (-65.29); and "Interactions & Other" with a "Bycatch" section containing a question "Was there any bycatch?" and "No" and "Yes" buttons.

Coordinate entry showing GPS auto-fill and manual entry option

11. Changing the Language

LobsterLog is available in English and French.

1. Tap **Settings**.
2. Tap Language.
3. Choose English or French. The app reloads in your chosen language.

12. Working Offline

Everything in LobsterLog is stored on your own phone. You can create, edit, and review your logbook entries with no internet connection at all. A connection is only needed when you actually send an entry to DFO.

The Provider's Instructions, the DFO Instructions, and all the app's help are kept on your phone, so you can reach them any time — even with no signal, as DFO requires.

13. Getting Help

13.1 LobsterLog app support

Contact LobsterLog for anything to do with using the app — setup, your ELOG key, how a feature works, GPS entry, or technical trouble.

Email: support@lobsterlog.com

Website: lobsterlog.ca

13.2 DFO Client Support

Contact DFO for corrections to reports you've already sent, to get your ELOG key, and for licensing or regulatory questions.

Phone: 1-877-535-7307

Hours: Monday to Friday, 8:00 a.m. to 9:00 p.m. Atlantic time

Website: dfo-mpo.gc.ca/elogs

One tool, one job done

Fill in your log at sea. Close your sections. Send it when you're back in range. That's the whole job — and LobsterLog keeps everything safe on your phone until it's done.
